**Public Water Systems Capacity Development Program**  
**State Fiscal Year 2019 Annual Implementation Report**

## **INTRODUCTION**

The Federal Safe Drinking Water Act Amendment of 1996 (SDWA) requires that each state implement a Capacity Development Program to improve the technical, managerial, and financial capacity of the state's public water systems and to prevent the creation of new public water systems that do not have the capacity to comply with current and future provisions of the SDWA. This report describes Mississippi's Capacity Development Program, and outlines the implementation results for the State Fiscal Year (SFY) 2019, which covers the period from July 1, 2018, through June 30, 2019. Submission of this report to the Environmental Protection Agency (EPA) Region IV in Atlanta, GA, represents one of the capacity development reporting milestones required by EPA to avoid withholdings from the FFY-2020 Drinking Water State Revolving Fund (DWSRF) capitalization grant.

## **NEW PUBLIC WATER SYSTEMS' CAPACITY DEVELOPMENT**

To comply with the capacity development requirements of the SDWA for new systems, the State Legislature enacted the Mississippi Safe Drinking Water Act (Section 41-26-8, MS Code of 1972 Annotated) to require that all new community and non-transient non-community public water systems be approved by the Mississippi State Department of Health (MSDH) prior to beginning construction. During the review/approval process, MSDH is required to ensure that each proposed new public water system has the technical and operational capacity to comply with all SDWA requirements. This process is effectively the Program's first "control point," or point at which the State can exercise authority to ensure the demonstration of a newly proposed system's capacity to serve its customers from the *technical* side. Another control point created by the State Law's revision is the requirement that, prior to approving a new public water system, MSDH must have written certification from the Executive Director of Mississippi's Public Utilities staff that the new water system has the *managerial* and *financial* capacity to comply with all SDWA requirements. There have been no changes in the State's legal authority or control points since the inception of the Capacity Development Program.

## **EXISTING PUBLIC WATER SYSTEMS' CAPACITY DEVELOPMENT**

Implementation of a capacity development program for existing public water systems is a much more difficult task than it is for new public water systems. The State of Mississippi has approximately 1,170 public water systems that are subject to the requirements of the SDWA. Since Mississippi is a rural state, the vast majority of these systems are small with limited financial resources. It is therefore impossible to develop a mandatory program in the State that would force all these small systems to immediately make the necessary capital improvements to achieve the technical, managerial, and financial capacity needed to comply with the SDWA. Additional requirements to the SDWA, such as the Ground Water Rule, have required small systems to make necessary improvements or consolidate their system with other surrounding systems. Regardless, the method implemented by MSDH consists primarily of two components: 1) stringent enforcement of existing laws and regulations, and 2) implementation of a capacity assessment rating system and technical assistance procedures.

**ENFORCEMENT** - MSDH stringently enforces the water supply laws and regulations, such as those related to: 1) SDWA water quality standards, 2) waterworks operator certification, 3) overloaded water systems, 4) corrosion control treatment facilities, 5) cross-connection control, and 6) water system board member training. By strictly enforcing these laws and regulations, MSDH helps ensure that a safe supply of drinking water is provided. Strict enforcement also encourages water systems without adequate capacity to seek alternate methods of compliance, including the pursuit of mergers with neighboring viable water systems. In most cases, these mergers (or "consolidations") result in the creation of much more viable public water systems in the capacity assessment categories.

**CAPACITY ASSESSMENT** - MSDH has developed a Capacity Assessment Rating Program to rate the capacity of existing systems. The technical, managerial, and financial capacity of each public water system is rated annually during inspections conducted by MSDH regional engineering staff. The maximum rating possible is "5.0", and a rating of "0.0" is the minimum. The rating is determined using Capacity Assessment Forms (CAFs), which consist of three major sections: 1) Technical, 2) Managerial, and 3) Financial. Each section includes key questions designed to identify those tasks that a public water system must routinely accomplish in order to demonstrate their capacity to comply with all current and proposed requirements of the SDWA and Mississippi's Safe Drinking Water Act.

The CAFs are developed by MSDH in conjunction with an Advisory Committee consisting of representatives of stakeholder organizations such as the Mississippi Rural Water Association; the Mississippi Municipal League; the Mississippi Water & Pollution Control Operators' Association; Communities Unlimited, Inc. (CU); Mississippi Board of Supervisors; Mississippi Development Authority; Public Service Commission, etc., as well as selected water system managers and operators from throughout the State. Each year, prior to the annual Advisory Committee meeting (typically held in the last quarter of the state fiscal year), MSDH staff reviews and evaluates the program, discusses the strengths, weaknesses, and any related problems which may have arisen during the fiscal year. The staff then recommends changes to be considered by the Advisory Committee. Later at the Advisory Committee meeting, the recommended changes are presented for review and comment. Additional suggestions may be offered during the meeting beyond initial staff recommendations. At the conclusion of the meeting, MSDH, using the Advisory Committee's suggestions, makes changes as needed to the Program's strategy for the following year's CAFs. At the conclusion of the review, the committee agreed to make a minor change to a question within the financial section. The committee also had a lengthy discussion about how the program could evolve to incorporate the concepts of water audits and asset management into its existing structure. All agreed the discussion should continue towards that endeavor, but additional tools and training should be developed and in place to help the systems transition to these new capacity development concepts.

Appendix A contains copies of the three CAFs used during SFY-2019. Included are the: 1) Standard Form – used for community public water systems; 2) Private Form – used for public water systems that are owned by private investors; and 3) Non-Transient Non-Community Form – used for public water systems that provide water to 25 or more of the same individuals, in a non-residential manner, on a daily basis (schools, industries, etc.). At this time a capacity assessment for systems meeting the definition of a Transient Non-Community public water supply is not required or performed.

**TECHNICAL ASSISTANCE** – One of the major advantages of the MSDH Capacity Assessment Rating is its ability to aid the department in identifying public water systems that are at risk of becoming unable to provide safe, adequate drinking water to their customers. Once systems are shown to have low capacity,

efforts are made to provide assistance to improve the systems within the limits of funding. Through grants from EPA, the Drinking Water Systems Improvements Revolving Loan Fund (DWSIRLF) Program funds, the Small System Technical Assistance Set-Aside, and the State Program Management Set-Aside. DWSIRLF technical assistance providers and the Bureau of Public Water Supply Staff provide technical assistance at no cost to at-risk water systems.

Technical assistance can take several forms which allow the water system recipients options to improve their technical, financial, and managerial capabilities. The EPA Capitalization Grant set-asides have provided MSDH the ability to contract with technical assistance providers such as Communities Unlimited, Inc. (CU), Mississippi Rural Water Association (MsRWA), and the Mississippi State University Extension Service (MSU-ES). The technical assistance providers are able to provide specialized assistance beyond which the MSDH Bureau of Public Water Supply staff can provide. The assistance includes: 1) Comprehensive and Intermediate Technical Assistance provided by MSU-ES; 2) PEER Review Program provided by MSU-ES; 3) Board Management Training Coordination provided by MSU-ES; 4) Hands-On Operator Training provided by MsRWA and 5) Asset Management provided by MsRWA. These programs have an impact on a system's ability to achieve or remain in compliance with the SDWA.

Annually, MSDH determines which public water systems have the greatest need of assistance. Based on the previous year's capacity assessment scores and SDWA violations, the technical assistance contractor and the PEER review program are provided a list of systems to contact to offer assistance. Periodic reports are provided by the contractors to MSDH to confirm that the assistance being provided is benefitting the public water supplies of Mississippi.

The Comprehensive and Intermediate technical assistance provided through MSU-ES allows the water system officials and staff to receive one-on-one assistance to improve their overall capacity ratings. This type of technical assistance is not voluntary; MSDH develops a list of the poorest performing systems and provides it to the technical assistance contractor. The listed water systems receive a letter notifying them of their selection for technical assistance. Refusing assistance may affect future compliance actions taken on that system, if warranted, by the Compliance and Enforcement Branch of MSDH. The assistance provided is specific and specialized, based on the water supply's needs. It could take the form of obtaining new management policies, financial budgeting, or operational improvements. MSDH Regional Engineering staff may recommend additional water systems for assistance that they deem need technical assistance; MSU-ES performs an assessment of the system by meeting with the officials and operator. After the assessment, MSU-ES develops a specialized task list of assistance for the system. After MSDH's approval of the specialized task list of assistance for the system, MSU-ES, in cooperation with the system, proceeds to execute the identified tasks. If the system is selected for comprehensive assistance, they can potentially receive the assistance throughout the year. In these instances, it is necessary to ensure that certain policies are implemented and management adjustments are made; MSU-ES monitors the changes throughout the improvement process. Selected intermediate systems are usually identified as having one or two major issues that can be resolved in considerably less time.

The PEER Review program provides improved technical operations to the water supply staff through peer-to-peer interaction. The voluntary program pairs selected water system operators with other water system operators to assist them in preparing for annual MSDH inspections. Similar to comprehensive and intermediate technical assistance, MSDH provides MSU-ES a list of poorly performing systems having Capacity Assessment scores less than 3.0. The technical assistance contractor contacts the referred systems by letter to determine their interest in participating in the PEER Review Program. To ensure that

the assistance will have the greatest impact, contact is made with the system's responsible officials as well as the certified operator. Additionally, the technical assistance contractor also advertises the benefits of the PEER Review Program at various trade shows and in publications throughout the year. A water system desiring a PEER Review contacts the contractor's personnel, who in turn, coordinate a meeting for all parties involved. This meeting includes at a minimum the operators/staff on the PEER Review team, the water system operator, and the responsible official(s). At that meeting, all components of the capacity assessment are performed, including an onsite inspection of the water system itself. Additionally, the PEER Review team looks beyond the standard capacity assessment by reviewing other technical, managerial, and financial aspects not previously evaluated. The team also brings each of their unique operational/managerial styles and experience due to the fact they have encountered many of the same problems. The team approach to problem solving provides an additional boost in capacity assessment areas thereby providing increased operational efficiency, managerial stability, and financial solvency. Shortly after the review is completed, a report by the PEER Review team is generated outlining the issues raised at the meeting, including suggestions for possible improvements that could be made for the benefit of the water system and its users. Whereas the comprehensive and intermediate assistance emphasizes managerial and financial components, the PEER Review Program primarily emphasizes technical components while providing limited managerial and financial assistance.

The Board Management Training Program for Water System Officials assists newly elected water system board members in meeting the requirements of State law. State law requires all newly elected water system board members of private, non-profit water supplies and officials of municipal systems with a population of 10,000 and less; receive training in their duties and management of a public water supply. Mississippi State University Extension Service (MSU-ES) coordinates with the selected training partners, to provide training throughout the state to these public water system officials. Board officials are given training that outlines their duties in managing and overseeing the operation of a public water system and their responsibilities under State law. This training allows new board members to have the management skills necessary to effectively fulfill their duties. For SFY-2019 an online format has been developed so board members may complete the required training online.

The Hands-On Operator Training conducted by MsRWA provides small system operators specialized "hands-on" training and skills they need in order to better operate their water systems on a daily basis. Some operators, especially new ones, may not have all the needed skills in order to effectively operate the water system. The training sessions, held throughout the State, provide participants with experience in actual hands-on skills such as meter repair, chlorinator repair, fire hydrant maintenance, leak detection, etc. The operators' newly acquired skills could lead to potential cost savings to the water system, since operators learn how to make repairs themselves rather than having to hire specialized help. Having these additional skills may in turn improve system performance and capacity.

The Asset Management Training program conducted by MsRWA provide all systems- but in particular small systems- the knowledge and understanding of what constitutes proper management of assets the system has in order to provide safe and consistent drinking water to their customers on a day-to-day basis. The program presents the key elements of what constitutes an asset, its service level, critical asset identification, life cycle and funding of assets both from the rehabilitation and replacement standpoints. The program also helps systems understand budgeting/audits and setting the proper rates to support care of system assets. At the conclusion of the day long trainings, attendees have created an initial framework for the management of their assets.

**2019 PROGRAM DETAILS** – The following provides the details of each of the assistance programs.

**Comprehensive and Intermediate Assistance:**

In SFY 2019, MSU-ES provided technical assistance to 12 public water systems. The following table lists the systems receiving assistance in SFY 2019 and shows their previous and present Capacity Assessment Ratings; some systems have not been rated since the assistance has been provided and some additional assistance may be necessary after the new ratings are provided.

|    | Systems Receiving Comprehensive Technical Assistance |             | 2018 Overall Capacity Assessment Ratings | 2019 Overall Capacity Assessment Ratings |
|----|--|-------------|--|--|
| 1  | Town of Crenshaw (Panola County)                     | Improved    | 2.00                                     | 3.33                                     |
| 2  | Town of Beulah (Bolivar County)                      | No Change*  | 2.00                                     | 2.00                                     |
| 3  | Arkabutla W/A (Tate County)                          | Improved    | 2.0                                      | 2.33                                     |
| 4  | Senatobia Lakes Estates (Tate County)                | No Change   | 0.33                                     | 0.33                                     |
| 5  | Hermanville Water Association (Clarborne Cty)        | Improved    | 1.00                                     | 4.00                                     |
| 6  | Twelve Oaks Water System (Lafayette County)          | Improved    | 2.33                                     | 2.67                                     |
| 7  | St. Patrick High School (Harrison County)            | Improved    | 2.50                                     | 3.50                                     |
| 8  | Bill's Trailer Park (Lamar County)                   | Dissolved** | 0.67                                     | ----                                     |
| 9  | Arlington Water Association (Perry County)           | Declined*   | 2.00                                     | 1.67                                     |
| 10 | Arlington W/A – Hintonville (Perry County)           | Declined*   | 2.00                                     | 1.67                                     |
| 11 | MS State Penitentiary MNLN (Sunflower Cty)           | Declined    | 1.50                                     | 0.50                                     |
| 12 | Cascilla W/A (Tallahatchie County)                   | No Change   | 4.00                                     | 4.00                                     |

|   |   |            |      |      |
|---|---|------------|------|------|
| 1 | Town of Coldwater (Tate County)             | No Service | 2.00 | 0.67 |
| 2 | Brooklyn Water Association (Forrest County) | No Service | 2.00 | 4.00 |

In reviewing the results, the assistance provided assisted 41% of the systems to improve their capacity assessment scores; some systems receiving assistance did regress or made no improvement, but overall a marked improvement was evident through the use of this technical assistance. Those noted with a “\*\*” received the technical assistance later in the fiscal year after their inspection. In these cases, impact of

technical assistance will not be evident until FY-2020. Those noted with “\*\*” received technical assistance to aid the system into dissolving and no longer falling under the SDWA regulations.

#### Board Management Training Program for Water System Officials:

In SFY 2019, Mississippi State University Extension Service successfully administrated 13 training sessions around the state in which 239 board members and managers were trained; this represented 157 public water supplies. Based on data generated after the end of the 2019 contract year (July 2019) there are 4,649 active public water system board members in Mississippi; of this number 293 or approximately 6.3% have not yet participated in a required Board Management Training session. It is anticipated that in the contract cycle (July 1, 2019 to June 30, 2020) that an online version of the Board Management Training Program for Water System Officials will be started; it is hoped that this will further reduce the number of board members and managers who have not received the required training by allowing them to complete the training online. Having system officials knowledgeable of the laws, regulations and requirements of how a system should be managed helps the overall operation of the public water supply program.

#### PEER Review Assistance:

Since the inception of the Peer Review Program in 2002, over two hundred (200) PEER Reviews have been conducted in the State through the end of the SFY 2019 reporting period. In SFY 2019 fourteen (14) reviews were conducted. The contractor for this program provides both monthly and quarterly reports of their activities including specific redacted reports of the individual PEER Reviews. Post PEER Review, systems seeking this voluntary program have shown on average an increase in 0.33 assessment points.

#### Hands-On Operator Training:

During SFY 2019, MsRWA was able to provide 14 Hands-On Operator Training session to 278 attendees representing 143 unique public water systems. Through the class, 192 certified operators were able to receive valuable class instruction that provided continuing education units necessary to maintain their certifications. The classes were also able to provide instruction to other public water system personnel in attendance.

#### Asset Management:

In SFY 2019, MsRWA was able to provide 3 training courses providing instruction to 96 attendees representing 52 different public water systems. As asset management represents the overall management of a public water system, officials of those systems play a key role in ensuring infrastructure is properly operated and maintained. It should be noted only half of the attendees were certified operators, thus indicating officials (managers and board members) of PWSs feel good asset management is important to system sustainability and resiliency. Moving forward, asset management will be a key metric in the state’s Capacity Development Program and strategy.

#### General Conclusions:

MSDH has found the majority of public water systems are making efforts to improve even though the Capacity Development Program for existing systems is not mandatory. There are no specific penalties for a water system refusing assistance (which does occasionally occur) or failing to improve/maintain their Capacity Assessment Rating, however, such actions do have inherent consequences. The annual capacity assessment results for all systems are publicized on the MSDH website. Similar to the perception of the Consumer Confidence Report (CCR), a primary goal of the program is for the public, not just the public water system, to take an active role in assuring the quality of their water supply. The general public wants

their utilities to be in compliance with laws and regulations, to be viable for the future, and to provide the best quality water at a reasonable cost.

Additional indirect consequences of failing to take action to improve Capacity Assessment Ratings include: 1) “losing” to neighboring water systems - many neighboring water systems view the capacity rating as a competition to see who has the “best” water system; and 2) receiving lower priority when seeking certain government funding.

If a public water supply is applying for a low interest improvement loan from the Mississippi DWSRF loan program, the loan program contains priority ranking incentives related to the Capacity Assessment Ratings; other government agencies such as the Mississippi Developmental Authority (CDBG Program) have included a portion of the Capacity Assessment Ratings in their reviews to evaluate applicants for funding. DWSRF requirements require when reviewing a project facility plan for a loan application (with a less than perfect Capacity Assessment Rating score), the potential loan recipients must address the deficiencies in their scores. This competition between water systems attempting to seek funding results in more viable water systems, which ultimately translates into a benefit to the customers and the general public.

## RESULTS

The efficacy of Mississippi’s Capacity Development Program is best demonstrated by the overall trending results of the scores. At the present time there are **1,174** active public water systems in the state; using the Enforcement Targeting Tool List (ETT) from EPA:

The July 2016 report listed 51 systems in the state with violations; of these 7 systems had an ETT score greater than 11.

The July 2017 report listed 17 systems in the state with violations; of these 16 systems had an ETT score greater than 11

The July 2018 report listed 7 systems in the state with violation; of these 2 systems had an ETT score greater than 11.

The July 2019 report listed 32 systems in the state with violations; of these 16 systems had an ETT score greater than 11.

Appendix B contains a complete listing of the Technical, Managerial, Financial, and Overall/Average Capacity Assessment Ratings (scores) of Mississippi's public water systems for SFY-2016, SFY-2017, SFY-2018, and SFY-2019. During the past reporting period the Capacity Assessment Ratings on average have shown a slight decrease; the “Yearly State Overall Averages” have increased from the SFY 2011 score of 4.09 as follows:

|          |      |
|----------|------|
| SFY 2012 | 4.20 |
| SFY 2013 | 4.30 |
| SFY 2014 | 4.41 |
| SFY 2015 | 4.43 |
| SFY 2016 | 4.43 |
| SFY 2017 | 4.40 |

|          |      |
|----------|------|
| SFY 2018 | 4.38 |
| SFY 2019 | 4.38 |

When reviewing the data, the following should be considered:

Consolidated or merged systems are indicated with “CON” - they were consolidated with other existing water supplies

Dissolved systems are indicated with “DIS” – they are no longer in service at all due to various reasons.

Newly created water supplies are identified by “NS”.

Transient, Non-Community Public Water Supplies are not required at this time to have Capacity Assessments performed; however, they are included in the Capacity Assessment listing of systems in Appendix B and are accounted for in the total 1,174 active public water supplies operating within the state.

## PUBLIC INVOLVEMENT

A primary goal of the Capacity Development Program is for the public, not just the public water systems, to take an active role in assuring the quality of the State’s water supply. Customers of public water systems which have received a high rating are encouraged to contact their water system officials to congratulate them for doing an excellent job of operating and managing their water system. Likewise, customers of public water systems which have received a low rating are strongly encouraged to contact their water system officials and request a copy of the system’s most recent Capacity Assessment Form. That form will quickly identify the areas where the water system needs improvement. A lower rating could indicate the system is more likely to be non-viable and thus unable to protect public health by complying with all SDWA requirements. Customers of such systems are also strongly encouraged to get involved with their water system to ensure any needed improvements are completed.

## FUTURE

With the changes to various federal requirements associated with America’s Water Infrastructure Act (AWIA), including the overall National Goal of a 25% reduction of systems with health-based violations, we will most likely see some systems having difficulty in meeting compliance requirements of EPA regulations such as the Ground Water Rule and Stage 2 Disinfection By-Products Rule. When new SDWA rules are issued there is a period of time where systems adjust to the new or revised regulations. During those periods of time, compliance as well as their capacity assessment scores could suffer somewhat. When specific concerns over regulations are raised, the Bureau is proactive in addressing system needs. These needs are addressed through new contractual assistance to individual systems or creating new training opportunities through the operator certification program by way of our training partners. It is MSDH’s intention to provide assistance to ensure non-compliance is kept to a minimum. MSDH has discovered it is easier and less costly to help systems maintain compliance by providing targeted technical assistance than by attempting to bring troubled systems back into compliance. We believe assistance of this type routinely improves overall compliance rates, the effectiveness of the capacity assessment program and water systems’ scores.

## **ASSET MANAGEMENT & CAPACITY**

Based on information from various sources, including recent legislation, it appears the water supply concepts of asset management and sustainable infrastructure will be a major part of future needs and requirements of water systems. Additional funding provided to the DWSRF program will allow for more specialized assistance in the previously mentioned areas of asset management planning or sustainable infrastructure to the water systems in the State. Furthermore, we believe the Board Management Training of officials of water systems of 10,000 population and less is having a positive impact on capacity assessment scores. In the current economic climate, water systems are “doing their best” with less financial and operational resources and hopefully, as economic conditions improve, many water systems can make significant infrastructure improvements that may be long overdue. As the concept of Asset Management (AM) gains renewed emphasis with the passage of AWIA, the Bureau will use the Capacity Assessment program as a prime strategy for encouraging its practice. During state fiscal year 2021, the Bureau will integrate this key sustainable element into its capacity development program by pairing it with questions concerning long range planning. This strategy combined with the Bureau’s current emphasis on the aforementioned AM training contract will be the primary method to push the concept of asset management to the state’s public water systems. Additionally, recent national grants awarded by the EPA to the National Rural Water Association (NRWA) and Rural Capacity Assistance Partners (RCAP) will filter down to their local representatives. In planning meetings, the Bureau has asked that asset management have a major emphasis in the technical assistance/training agendas of their portion of the grants.

## **SUMMARY**

Through the passage of proper legislation, the strict enforcement of existing laws and regulations, and the implementation of sound capacity assessment and technical assistance procedures, Mississippi continues a Capacity Development Program that has resulted in higher levels of technical, managerial, and financial capacity of new and existing public water systems throughout the State. The program also provides an additional benefit to the public in the form of better utilization of assistance resources and funding. Although no major changes have been made in recent years, the annual evaluation process, along with the Advisory Committee review and public involvement, help to assure any needed future changes are identified and implemented in a timely manner to evolve the program to meet the needs of the state and the changing regulatory environment.

If there are questions regarding the information presented in this report, or if you have recommendations for improving the Public Water System Capacity Development Program, please contact:

William F. Moody, P.E., BCEE, Director  
Bureau of Public Water Supply  
P. O. Box 1700  
Jackson, MS 39215-1700

| Technical Capacity Assessment   | Point Scale                                      | Point Award |
|---|--|-------------|
| [T1] Does the water system have any significant deficiencies? [Y N]   | N - 1pt.<br>Y - 0pt.                             |             |
| [T2] 1) Was the water treatment process functioning properly? [Y N] (i.e. Is pH, iron, chlorine, fluoride, etc. within acceptable range?) 2) Was needed water system equipment in place and functioning properly at the time of survey? [Y N] (NOTE: Equipment deficiencies must be identified in survey report.) 3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years? [Y N NA] (NOTE: All YESs required to receive point)   | All Y - 1 pt.<br>Else - 0 pt.                    |             |
| [T3] 1) Was the certified waterworks operator or his/her authorized representative present for the survey? [Y N] 2) Was log book up to date and properly maintained? [Y N] (Are minimum days being met based on system classification) 3) Was the water system properly maintained at the time of survey? [Y N] 4) Did operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system? [Y N] (NOTE: All YESs required to receive point)   | All Y - 1 pt.<br>Else - 0 pt.                    |             |
| [T4] 1) Does water system routinely track water loss and were acceptable record available for review? [Y N] 2) Is water system overloaded? (i.e. serving customers in excess of MSDH approved design capacity)? [Y N] 3) Was there any indication that the water system is/has been experiencing pressure problems in any part(s) of the distribution system? [Y N] (based on operator information, customer complaints, MSDH records, other information) 4) Are well pumping tests performed routinely? [Y N NA]<br>(NOTE: YES FOR #1 & YES OR N/A FOR #4 AND NOs FOR #2 & #3 required to receive point) | 1)Y - pt.<br>2)N - pt.<br>3)N - pt.<br>4)Y - pt. |             |
| [T5] 1) Does the water system have the ability to provide water during power outages? (i.e. generator, emergency tie-ins, etc.) [Y N] 2) Does the water system have a usable backup source of water? [Y N]<br>(NOTE: Must be documented on survey report)   | All Y - 1 pt.<br>Else - 0 pt.                    |             |
| <b>TECHNICAL CAPACITY RATING = [ ____ ] (Total Points)</b>  |  |             |

| <b>Managerial Capacity Assessment</b>  | <b>Point Scale</b>            | <b>Point Award</b> |
|--|-------------------------------|--------------------|
| [M1] Were all SDWA required records maintained in a logical and orderly manner and available for review by the regional engineer during the survey? [ Y N ]  | Y - 1pt.<br>N - 0pt.          |                    |
| [M2] 1) Have acceptable written policies and procedures for operating this water system been formally adopted and were these policies available for review during the survey? [ Y N ] 2) Have all board members (in office more than 12 months) completed Board Member Training? [ Y N NA ] 3) Does the Board of Directors meet monthly and were minutes of Board meetings available for review during the survey? (NOTE: Quarterly meetings allowed if system has an officially designated full time manager) [ Y N NA ] (NOTE: ALL YESs or NAs required to receive point. NA - Not Applicable) | All Y - 1 pt.<br>Else - 0 pt. |                    |
| [M3] Has the water system had any SDWA violations since the last Capacity Assessment? [ Y N ]  | N - 1pt.<br>Y - 0pt.          |                    |
| [M4] Has the water system developed a long range improvements plan and was this plan available for review during the survey? [ Y N ]   | Y - 1pt.<br>N - 0pt.          |                    |
| [M5] 1) Does the water system have an effective cross connection control program in compliance with MSDH regulations? [ Y N ] 2) Was a copy of the MSDH approved bacti site plan and lead/copper site plan available for review during the survey and do the bacti results clearly show that this approved plan is being followed? [ Y N ] (NOTE: All YESs required to receive point)  | All Y - 1 pt.<br>Else - 0 pt. |                    |
| <b>MANAGERIAL CAPACITY RATING = [ _____ ] (Total Points)</b>   |                               |                    |

| <b>Financial Capacity Assessment</b>  | <b>Point Scale</b>            | <b>Point Award</b> |
|---|-------------------------------|--------------------|
| [F1] Has the water system raised water rates in the past 5 years? [ Y N ] (NOTE: Point may be awarded if the water system provides acceptable financial documentation clearly showing that a rate increase is not needed, i.e. revenue has consistently exceeded expenditures by at least 10%, etc.)                                      | Y - 1pt.<br>N - 0pt.          |                    |
| [F2] Does the water system have an officially adopted policy requiring that water rates be routinely reviewed and adjusted as appropriate and was this policy available for review during the survey? [ Y N ]   | Y - 1pt.<br>N - 0pt.          |                    |
| [F3] Does the water system have an officially adopted cut-off policy for customers who do not pay their water bills, was a copy of this policy available for review by the regional engineer, and do system records (cut-off lists, etc.) clearly show that the water system effectively implements this cut-off policy? [ Y N ]          | Y - 1pt.<br>N - 0pt.          |                    |
| [F4] Was a copy of the water system's officially adopted annual budget available for review by the regional engineer and does the water system's financial accounting system clearly and accurately track the expenditure and receipt of funds? [ Y N ]   | Y - 1pt.<br>N - 0pt.          |                    |
| [F5 - Municipal Systems] 1) Was a copy of the latest audit report available for review at the time of the survey? [ Y N ] 2) Does this audit report clearly show that water and sewer fund account(s) are maintained separately from all other municipal accounts? [ Y N ] (NOTE: Yes answer to all questions required to receive point.) | All Y - 1 pt.<br>Else - 0 pt. |                    |
| [F5 - Rural Systems] 1) Was the latest financial report / audit report available for review? [ Y N ] 2) Does the latest financial report show that receipts exceeded expenditures? [ Y N ] (NOTE: Yes answer to both questions required to receive point)   | All Y - 1 pt.<br>Else - 0 pt. |                    |
| <b>FINANCIAL CAPACITY RATING = [ _____ ] (Total Points)</b>   |                               |                    |

**Mississippi State Department of Health  
Bureau of Public Water Supply  
Capacity Development Rating Form Assessment Criteria  
01 July 2018 - 30 June 2019**

**Technical Capacity**

**T1 Does the water system have any significant deficiencies?**

**T2 (1) Was the water treatment process functioning properly?** Corrosion control plants: within - 0.5 of target pH (approximately 8.4, Langlier Index, or 7.2-7.8 if adding phosphate for corrosion AND minimum phosphate residual of 0.5 mg/L as P or 1.5 mg/L as PO<sub>4</sub> (most test kits)), Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide residual throughout system, spot checked on system, Systems adjusting Fluoride: 0.7 - 1.3 mg/l with optimum dose at 0.7 mg/l.

**T2 (2) Was needed water system equipment in place and functioning properly at the time of survey?**

Adequate security: locked fence around wells/treatment plant/tank (6' or 5' + barbed wire at top), locked hatches on water storage tanks (operator verifies), Security Vulnerability Self-Assessment and Emergency Response Plan, both updated annually. Required equipment in place (i.e., phosphate and/or fluoride feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report.

**T2 (3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years?** Maintenance and painting contracts, tank inspection reports, operator can inspect own tank if he/she writes a report and/or takes pictures, painted if needed. This can include tanks that are a part of the treatment process including clearwells.

**T3 (1) Was the certified waterworks operator or his/her authorized representative present for survey?** Operator or representative must be present unless emergency; operator of record shouldn't miss two in a row.

**T3 (2) Was the operations record up to date and properly maintained?** Operations record: CI2 recorded as required, pH, Fe, Fluoride, and phosphate where applicable. Did operations record indicate the minimum required operator presence was performed based on system classification?

**T3 (3) Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, plant presentable, etc.

**T3 (4) Did the operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system?** Must have appropriate test kits, fresh reagents, and able to perform tests (where applicable: chlorine, pH, iron, fluoride, phosphate). Regional engineer may perform tests to verify operator's results. Chlorine test must be performed by operator at all inspections.

**T4 (1) Does water system routinely track water loss and were acceptable records available for review?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly.

**T4 (2) Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording.

- T4 (3) Was there any indication that the water system is/has been experiencing low pressure in any part(s) of the distribution system?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report
- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement. Service logs may be checked at time of survey.
- T5 (2) Does the water system have a usable backup source of water?**
- Managerial Capacity**
- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 (1) Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits, wastewater requirements) and subdivision/line extension policy (written procedure requiring developer/system obtain MSDH approval before construction begins) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Flushing program (flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept.), Updated distribution map (can be updated by operator), or SARA Tier II (report of hazardous chemicals, quantity, location provided to local and state fire, law and EOC's).
- M2 (2) Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy) available for review. This does not apply to Municipalities with population over 10,000.
- M2 (3) Does Board meet monthly and were minutes of Board meetings available for review?** Allow quarterly meetings with full time manager. Manager must be appointed by the board and documentation of appointment provided.
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a long range improvement plan and was this plan available for review?** Hydraulic analysis, engineering report, completed State Needs Survey Form or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years. Plan in use should indicate progress towards improvements. Water systems need to provide proof of annual review by the governing body of the water system.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.

**M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.

#### **Financial Capacity**

- F1 Has the water system raised water rates in the past 5 years?** Credit also allowed if revenue exceeds expenditures (excluding out of pocket for major improvements and depreciation) by 10% for past five years.
- F2 Does the water system have an official policy requiring rates routinely reviewed and adjusted if necessary?** Must be in minutes showing adopted
- F3 Is the water system following an official cut off policy?** Must be published (in minutes or on bills), must follow policy (cut off customers who by policy should be cut off)
- F4 Was a copy of system's adopted annual budget available for review and does financial accounting system clearly and accurately track receipts and expenditures?** Must provide copy of budget and balance sheet (income statement) for review.
- F5 Was a copy of the latest audit report (Municipal) available for review? Were water and sewer fund accounts separate from other accounts?** List of violators, copy in records, can accept CPA audit report
- F5 1) Was the latest financial report/audit report available for review? copy in records, can accept CPA audit report. 2) Does the latest report show that receipts exceed expenditures?** Excluding out of pocket for major improvements

(This page intentionally left blank)

**Mississippi Department of Health  
Bureau of Public Water Supply**

**PRIVATE FORM**

**FY 2019 Public Water System Capacity Assessment Form**

**NOTE:** This form must be completed whenever a routine sanitary survey of a public water system is conducted by a regional engineer of the Bureau of Public Water Supply.

PWS ID#: \_\_\_\_\_ Class: \_\_\_\_\_ Survey Date: \_\_\_\_\_ County: \_\_\_\_\_

Public Water System: \_\_\_\_\_ Conn: \_\_\_\_\_

Certified Waterworks Operator: \_\_\_\_\_ Pop: \_\_\_\_\_

**CAPACITY RATING DETERMINATION**

Technical (T) Capacity Rating: [\_\_\_\_\_] Managerial (M) Capacity Rating [\_\_\_\_\_] Financial (F) Capacity Rating [\_\_\_\_\_]

$$\text{Capacity Rating} = \frac{T + M + F}{3} = \frac{ }{3} =$$

**Overall Capacity Rating = \_\_\_\_\_**

Completed by on

**Comments:** \_\_\_\_\_

**Mississippi State Department of Health  
Bureau of Public Water Supply  
Capacity Development Rating Form Assessment Criteria**  
01 July 2018 - 30 June 2019

**Technical Capacity**

**T1 Does the water system have any significant deficiencies?**

**T2 (1) Was the water treatment process functioning properly?** Corrosion control plants: within - 0.5 of target pH (approximately 8.4, Langlier Index, or 7.2-7.8 if adding phosphate for corrosion AND minimum phosphate residual of 0.5 mg/L as P or 1.5 mg/L as PO<sub>4</sub> (most test kits)), Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide residual throughout system, spot checked on system, Systems adjusting Fluoride: 0.7 - 1.3 mg/l with optimum dose at 0.7 mg/l.

**T2 (2) Was needed water system equipment in place and functioning properly at the time of survey?**

Adequate security: locked fence around wells/treatment plant/tank (6' or 5' + barbed wire at top), locked hatches on water storage tanks (operator verifies), Security Vulnerability Self-Assessment and Emergency Response Plan, both updated annually. Required equipment in place (i.e., phosphate and/or fluoride feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report.

**T2 (3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years?** Maintenance and painting contracts, tank inspection reports, operator can inspect own tank if he/she writes a report and/or takes pictures, painted if needed. This can include tanks that are a part of the treatment process including clearwells.

**T3 (1) Was the certified waterworks operator or his/her authorized representative present for survey?**

Operator or representative must be present unless emergency; operator of record shouldn't miss two in a row.

**T3 (2) Was operations record up to date and properly maintained?** Operations record: CI2 recorded as required, pH, Fe, Fluoride, and phosphate where applicable. Did record indicate the minimum required operator presence was performed based on system classification.

**T3 (3) Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, plant presentable, etc.

**T3 (4) Did the operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system?** Must have appropriate test kits, fresh reagents, and able to perform tests (where applicable: chlorine, pH, iron, fluoride, phosphate). Regional engineer may perform tests to verify operator's results. Chlorine test must be performed by operator at all inspections.

**T4 (1) Does water system routinely track water loss and were acceptable water loss records available for review by the regional engineer?** Requires metered connections and master meter or annual pump test with run time. Must show calculating water loss at least quarterly.

**T4 (2) Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording.

- T4 (3) Was there any indication that the water system is/has been experiencing low pressure in any part(s) of the distribution system?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report
- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement. Service logs may be checked at time of survey.
- T5 (2) Does the water system have a usable backup source of water?**
- Managerial Capacity**
- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 (1) Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have water users agreement (connection fees, late charges, deposits, wastewater requirements) and subdivision/line extension policy (written procedure requiring developer/system obtain MSDH approval before construction begins) and either By-laws or Job Description for Employees (employee handbook), plus at least two of the following: Emergency or contingency plan (chain of command, phone numbers, etc.), Flushing program (flushing schedule w/ records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/ fire dept.), Updated distribution map (can be updated by operator), or SARA Tier II (report of hazardous chemicals, quantity, location provided to local and state fire, law and EOC's).
- M2 (2) Have all Board Members (in office more than 12 months) completed Board Member Training?** Must have certificate (or copy) available for review. This does not apply to Municipalities with population over 10,000.
- M2 (3) Does Board meet monthly and were minutes of Board meetings available for review?** Allow quarterly meetings with full time manager. Manager must be appointed by the board and documentation of appointment provided.
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a long range improvement plan and was this plan available for review?** Hydraulic analysis, engineering report, completed State Needs Survey Form or list of goals prepared by operator and adopted by board, can give credit for major improvement project within past 5 years. Plan in use should indicate progress towards improvements. Water systems need to provide proof of annual review by the governing body of the water system.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.

**Financial Capacity**

- F1 Does the water system have a Certificate of Need and Necessity (certified service area) issued by PSC?** Copy of tariff or PSC filings
- F2 Has the water system petitioned PSC for a rate increase in the past 5 years?** Credit given if the water system provides acceptable documentation clearly showing that receipts consistently exceed expenditures by 10%.
- F3 Is the water system following an official cut off policy?** Must be published in tariff or lease agreement, must follow policy (cut off customers who by policy should be cut off).
- F4 Was a copy of system's adopted annual budget available for review and does financial accounting system clearly and accurately track receipts and expenditures?** Must provide copy of budget and balance sheet (income statement) for review.
- F5**
  - 1) Does the water system file annual financial reports with PSC and copy available for review?** Must provide copy.
  - 2) Does the latest financial report show that receipts exceed expenditures?** Excluding out of pocket for major improvements.

**Mississippi Department of Health  
Bureau of Public Water Supply**

NON-TRANSIENT, NON-COMMUNITY FORM

**FY 2019 Public Water System Capacity Assessment Form**

**NOTE:** This form must be completed whenever a routine sanitary survey of a public water system is conducted by a regional engineer of the Bureau of Public Water Supply

PWS ID#: \_\_\_\_\_ Class: \_\_\_\_\_ Survey Date: \_\_\_\_\_ County: \_\_\_\_\_

Public Water System: \_\_\_\_\_ Conn: \_\_\_\_\_

Certified Waterworks Operator: \_\_\_\_\_ Pop: \_\_\_\_\_

**CAPACITY RATING DETERMINATION**

Technical (T) Capacity Rating: [\_\_\_\_\_] Managerial (M) Capacity Rating [\_\_\_\_\_]

$$\text{Capacity Rating} = \frac{T + M}{2} = \frac{\underline{\hspace{2cm}}}{2} =$$

**Overall Capacity Rating = \_\_\_\_\_**

Completed by on

**Comments:** \_\_\_\_\_

| Technical Capacity Assessment  | Point Scale                                      | Point Award |
|--|--|-------------|
| [T1] Does the water system have any significant deficiencies? [Y N]  | N - 1pt.<br>Y - 0pt.                             |             |
| [T2] 1) Was the water treatment process functioning properly? [Y N] (i.e. Is ph, iron, free chlorine, etc. within acceptable range?) 2) Was needed water system equipment in place and functioning properly at the time of survey? [Y N] (NOTE: Equipment deficiencies must be identified in survey report.) 3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years? [Y N NA]  | All Y - 1 pt.<br>Else - 0 pt.                    |             |
| [T3] 1) Was the certified waterworks operator or his/her authorized representative present for the survey? [Y N] 2) Was log book up to date and properly maintained? [Y N] 3) Was water system properly maintained at time of survey? [Y N] 4) Did operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system? [Y N] (NOTE: All YESs required to receive point)  | All Y - 1 pt.<br>Else - 0 pt.                    |             |
| [T4] 1) Does water system routinely track water production and were acceptable water production records available for review by the regional engineer? [Y N] 2) Is water system overloaded? (i.e. serving customers in excess of MSDH approved design capacity)? [Y N] 3) Was there any indication that the water system is/has been experiencing pressure problems in any part(s) of the distribution system? [Y N] (based on operator information, customer complaints, MSDH records, other information) 4) Are well pumping tests performed routinely? [Y N NA]<br>(NOTE: YES for #1 & YES OR N/A FOR #4 and NOs for #2 & #3 required to receive point) | 1)Y - pt.<br>2)N - pt.<br>3)N - pt.<br>4)Y - pt. |             |
| [T5] 1) Does the water system have the ability to provide water during power outages? (i.e. generator, emergency tie-ins, etc.) [Y N] NOTE: Systems may provide bottled water if included as part of a published emergency plan. 2) Does the water system have a usable backup source of water? [Y N]  | All Y - 1 pt.<br>Else - 0 pt.                    |             |
| <b>TECHNICAL CAPACITY RATING = [ ____ ] (Total Points)</b>   |  |             |

| <b>Management Capacity Assessment</b>  | <b>Point Scale</b>            | <b>Point Award</b> |
|--|-------------------------------|--------------------|
| [M1] Were all SDWA required records maintained in a logical and orderly manner and available for review by the regional engineer during the survey? [Y N]  | Y - 1pt.<br>N - 0pt.          |                    |
| [M2] Have acceptable written policies and procedures for operating this water system been formally adopted and were these policies and procedures available for review during the survey? [Y N]  | Y - 1pt.<br>N - 0pt.          |                    |
| [M3] Has the water system had any SDWA violations since the last Capacity Assessment? [Y N]  | N - 1pt.<br>Y - 0pt.          |                    |
| [M4] Has the water system developed a preventive maintenance schedule and was a copy of this schedule available for review during survey? [Y N]  | Y - 1pt.<br>N - 0pt.          |                    |
| [M5] 1) Does the water system have an effective cross connection control program in compliance with MSDH regulations? [Y N] 2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and do bacti results clearly show this approved plan is being used for all bacti monitoring? [Y N] | All Y - 1 pt.<br>Else - 0 pt. |                    |
| <b>MANAGEMENT CAPACITY RATING = [        ] (Total Points)</b>  |                               |                    |

**Mississippi State Department of Health  
Bureau of Public Water Supply  
Capacity Development Rating Form Assessment Criteria  
01 July 2018 - 30 June 2019**

**Technical Capacity**

**T1 Does the water system have any significant deficiencies?**

**T2 (1) Was the water treatment process functioning properly?** Corrosion control plants: within - 0.5 of target pH (approximately 8.4, Langlier Index, or 7.2-7.8 if adding phosphate for corrosion AND minimum phosphate residual of 0.5 mg/L as P or 1.5 mg/L as PO<sub>4</sub> (most test kits)), Iron removal plants: finished water Fe < 0.3 mg/l, Chlorine: Adequate at plant to provide residual throughout system, spot checked on system, Systems adjusting Fluoride: 0.7 - 1.3 mg/l with optimum dose at 0.7 mg/l.

**T2 (2) Was needed water system equipment in place and functioning properly at the time of survey?**

Adequate security: locked fence around wells/treatment plant/tank (6' or 5' + barbed wire at top), locked hatches on water storage tanks (operator verifies), Security Vulnerability Self-Assessment and Emergency Response Plan, both updated annually. Required equipment in place (i.e., phosphate and/or fluoride feeders on all wells if required), major components sized correctly if affects water quality or quantity, major components working at time of inspection unless provisions for repairs made. Must be noted on inspection report.

**T2 (3) Were records available to the regional engineer clearly showing that all water storage tanks have been inspected and cleaned or painted (if needed) within the past 5 years?** Maintenance and painting contracts, tank inspection reports, operator can inspect own tank if he/she writes a report and/or takes pictures, painted if needed. This can include tanks that are a part of the treatment process including clearwells.

**T3 (1) Was the certified waterworks operator or his/her authorized representative present for survey?** Operator or representative must be present unless emergency; operator of record shouldn't miss two in a row.

**T3 (2) Was operations record up to date and properly maintained?** Operations record: CI2 recorded as required, pH, Fe, Fluoride, and phosphate where applicable. Did record indicate the minimum required operator presence was performed based on system classification.

**T3 (3) Was the water system properly maintained at the time of survey?** Grass cut, packing not leaking excessively, plant presentable, etc.

**T3 (4) Did the operator/system personnel satisfactorily demonstrate to the regional engineer that he/she could fully perform all water quality tests required to properly operate this water system?** Must have appropriate test kits, fresh reagents, and able to perform tests (where applicable: chlorine, pH, iron, fluoride, phosphate). Regional engineer may perform tests to verify operator's results. Chlorine test must be performed by operator at all inspections.

**T4 (1) Does water system routinely track water production and were acceptable records available for review?** Requires master meter or annual pump test with run time. Must show calculating water production at least quarterly.

**T4 (2) Is the water system overloaded?** Cannot exceed MSDH design capacity, consecutive systems overloaded if supplier overloaded or based on hydraulic calculations or pressure recording.

- T4 (3) Was there any indication that the water system is/has been experiencing low pressure in any part(s) of the distribution system?** Documented by hydraulics or pressure recording, or verified by operator. Must be documented on inspection report.
- T4 (4) Are well pumping tests performed routinely?** Must have pump tests at least every two years on all wells that are greater than three (3) years old, OR pump tests every year on wells at systems with design capacity exceeding 80%.
- T5 (1) Does the water system have the ability to provide water during power outages?** Credit given for generators, can give credit for emergency tie-ins w/ system w/ generator if hydraulics work, credit given for right angle drive if motor attached during survey, may be required to operate during inspection. Credit given for generator on trailer if quick-connect, systems with elevated storage may share generator on trailer, must have prior agreement. Credit not given for renting generator w/o contract. SYSTEM MAY PROVIDE BOTTLED WATER IF INCLUDED AS PART OF A PUBLISHED EMERGENCY PLAN. Service logs may be checked at time of survey.
- T5 (2) Does the water system have a usable backup source of water?**
- Managerial Capacity**
- M1 Were all SDWA required records maintained in logical and orderly manner and available for review?** In one location, sample results, MSDH correspondence, copy of CCR report, etc.
- M2 Have acceptable written policies and procedures for operating this water system been formally adopted and available for review?** Must have Job Description for Employees associated with potable water system (employee handbook) and Emergency or Contingency plan (chain of command, phone numbers, etc.), plus at least one of the following: Construction policy (written procedure requiring MSDH approval before construction begins), Flushing program (flushing schedule w/records), Fire hydrant policy (maintenance schedule, flow tests, agreement w/fire dept.), Updated distribution map (can be updated by operator), or SARA Tier II (report of hazardous chemicals, quantity, location provided to local and state fire, law and EOC's).
- M3 Has the water system had any SDWA violations since the last Capacity Assessment?** System and Regional Engineer's records
- M4 Has the water system developed a preventative maintenance schedule and was this plan available for review?** Maintenance schedule for: wells (including annual pump tests), service pumps, tank inspections, with recommendations and corrective action taken. Documentation must be available for review.
- M5(1) Does the water system have an effective cross connection program in compliance with MSDH regulations?** Shall include the following: Cross connection policy, records of backflow preventers installed on the system, current test results for each backflow preventer on system.
- M5(2) Was a copy of the MSDH approved bacti sample site plan and lead and copper sample site plan available for review and bacti results show site plan is followed?** Copy of sampling site plans available and bacti results show plan is being followed.
