Preface

Overview

This publication reflects data collected in the hospital licensure process. A historical accounting of the responsibility for this function began in 1946 when the Mississippi Commission on Hospital Care was legislatively authorized to license non-federal hospitals and prepare an annual report. In 1979 the legislature passed a bill to merge the responsibilities of the Commission on Hospital Care into the Mississippi Health Care Commission and in 1986 another bill was passed to merge the responsibilities into the State Department of Health.

In October 1996, the Division of Health Facilities Licensure and Certification mailed copies of its combined "Annual Hospital Report and Application for Renewal of Hospital Licensure" and the American Hospital Association's "Annual Survey of Hospitals" to all non-federal hospitals in Mississippi. This survey is the source of statistics for this publication. A copy of the survey form is included in Appendix E. The hospital survey forms were reviewed and automated by the Division of Public Health Statistics. Questions regarding reported data were answered by hospital personnel through letters or telephone calls.

In 1982, for planning purposes, the Statewide Health Coordinating Council (SHCC) established seven hospital service areas based on where patients sought hospital care. For ease in using the data presented in this report some tables are presented by the planning service areas. Map II displays the hospital service areas.

This Annual Report is based on 108 hospitals; 99 acute care, 4 psychiatric, 1 chemical dependency, 1 rehabilitation, 1 obstetrics and gynecology facility, and 2 long-term acute care. Data for River Oaks East Woman's Pavilion, the only obstetrics and gynecology hospital in the state, is included in acute care. Also, data for Restorative Care Hospital at Baptist is included in acute care. The five federal hospitals in Mississippi have been excluded. Additionally, East Mississippi State Hospital, Mississippi State Hospital, Oak Circle Center, and Whitfield Medical/Surgical Hospital have been excluded from all data except Map I, Table II, and Table III. Methodist Medical Center North is included although no patients were reported during the reporting period. Bruce Hospital in Calhoun County closed. Map I shows location of hospitals by type of facility, Table II shows accreditations and Table III displays employees.

Hospital Ownership and Certification

As Map I indicates, the overwhelming majority, 100, of hospitals in Mississippi are classified as medical/surgical. There are seven psychiatric/mental hospitals, one rehabilitation hospital, one alcoholism and chemical dependency hospital, and one obstetrics and gynecology hospital. These figures were based on the type of service that the hospital provided to the majority of admissions.

The six counties in Mississippi that do not have a hospital are Anhite, Benton, Carroll, Greene, Issaquena, and Tunic. The counties having the most hospitals are Hinds with eight and Rankin with seven, Lauderdale with six and Harrison with five. Fifteen counties have 2 hospitals and fifty-six counties have one hospital.

Ownership and control of hospitals and beds are shown in Tables I-A through I-D. In 1996 there were 102 acute care hospitals and 11,615 licensed acute care beds. (This
count excludes Whitfield Medical Surgical Hospital and includes River Oaks Hospital Women’s Pavilion, Restorative Care Hospital at Baptist, and Specialty Hospital of Meridian.) Seventeen hospitals reported 643 licensed psychiatric beds. Approximately 59% of the beds, 377, were located at acute care hospitals. Twenty hospitals reported 442 licensed chemical dependency beds. Approximately 80% (352 beds) were located at acute care facilities. Seven hospitals reported 265 rehabilitation beds. More than half (141) were located at 6 acute care facilities.

Table II indicates that 52.7% of the hospitals are accredited by the Joint Commission on Accreditation of Hospitals (JCAH). Almost all of the hospitals, 98.2% participate in Blue Cross, Medicare, and Medicaid.

Hospital Employees

Table III deals with hospital personnel. Mississippi’s hospitals employed 52,722 people during FY 95; 81% of which were full-time employees and 19% of which were part-time employees.

Services Utilization

Tables IV - XII show number of procedures by hospital service area for the following categories:

- Head and Body CT Scans
- Diagnostic Radiosotope
- X-Ray
- Magnetic Resonance Imaging
- Ultrasound
  - Digital Subtraction Angiography
  - Single Photon Emission
- Computerized Tomography (SPECT)
- Cobalt 60
- Linear Accelerator
- Radioactive Implants
- Therapeutic Radiosotope
- X-Ray Radiation Therapy
- Cardiac Catheterization
- Cardiac Catheterization
- Angioplasty
- Cardiac Surgeries
- Renal Extracorporeal Shock Wave
- Lithotripter
- Hemodialysis
- Physical Therapy
- Occupational Therapy
- Geriatric Patients Served
- Respite Patients Served
- Inpatient and Outpatient Surgeries
- Outpatient Utilization
- Rural Health Clinics
- Cardiac Catheterization
- Cardiac Catheterization
- Cardiac Catheterization
- Cardiac Catheterization

During 1996 Hospital Service Area 3 reported the greatest number of procedures for every category except hemodialysis, occupational therapy and outpatient physical therapy. Hospital Service Area 1 reported the most occupational therapy procedures, and Hospital Service Area 7 reported the most outpatient physical therapy procedures. Hospital service areas are shown in Map II.

Eighty hospitals reported 113,737 inpatient surgeries and eighty-two hospitals reported 122,120 outpatient surgeries. As Table X shows, the majority of surgeries were performed in Service Area 3.
Table XI presents outpatient emergency visits and clinic/other visits by Hospital Service Area. Service Area 3 reported both the most outpatient emergency visits and clinic/other visits.

Twenty-nine hospitals reported 50 rural health clinics and 215,678 rural health clinic visits. Table XII shows rural health clinics and visits by hospital service area.

**Bed Changes**

Beacham Memorial Hospital increased acute care beds from 34 to 37.

Columbia Vicksburg Medical Center decreased psychiatric beds from 34 to 20.

Memorial Hospital at Gulfport increased acute care beds from 263 to 274.

Methodist Medical Center relocated 64 acute care beds to Methodist Medical Center North, thereby decreasing their beds from 444 to 380.

Mississippi State Hospital decreased psychiatric beds from 1,437 to 1,417. This changes their total licensed beds from 1,526 to 1,506.

Oak Circle Center increased psychiatric beds by 20, increasing their total to 60.

**Licensed Beds, Average Length of Stay, Average Daily Census and Occupancy Rate**

Table XII shows hospitals and beds by bed size groupings. Occupancy rates are also shown by bed size. Under acute care the greatest number of hospital beds were reported at hospitals with 50-99 beds, 25-49 beds and 100-199 beds. Of the 17 hospitals reporting psychiatric beds, 4 were licensed as psychiatric hospitals. Four hundred forty seven chemical dependency beds were reported at 20 hospitals. Seven hospitals reported 265 rehabilitation beds. Map III looks at the distribution of 108 Mississippi hospitals by bed size and county.

Table XIV-A gives average lengths of stay (ALOS), average daily census (ADC), percentages of occupancy for each hospital by licensed acute care bed capacity and state totals. Psychiatric data can be found in Table XIV-B, chemical dependency data in Table XIV-C, and rehabilitation data in Table XIV-D. Map IV displays location of psychiatric, chemical dependency and rehabilitation beds.

A comparison of licensed beds and beds set up and staffed is shown in Tables XV-A - XV-D. Of the 11,615 licensed acute beds, 10,169 beds were set up and staffed. Six hundred twenty-nine of the 638 licensed psychiatric beds were set up and staffed. Four hundred thirty-six of the 447 licensed chemical dependency beds were set up and staffed. And, two hundred forty of the 265 rehabilitation beds were set up and staffed.

**Swing Beds**

Table XVI shows the number of swing beds, average length of stay and average daily census by facility. Table XMI shows the destination of discharged swing bed patients, number referred to home health, and number of acute care beds designated as
swing beds by service area. More than one-half (57.9%) were discharged to their home, 15.4% were discharged to nursing homes, 10.8% were admitted to hospitals, 2% were admitted to personal care homes, and the remaining 14% were discharged to other destinations.

Swing bed utilization in 1996 by hospital service area is shown in Table XVII.

**Hospital Use Statistics**

Table XIX shows the population of each service area in comparison with its licensed bed capacity. Service areas are maintaining a relatively close correlation between the percentage of population and percentage of licensed hospital beds. Service Area 3, including the city of Jackson and Hinds County, has the largest population at 26.1% and the most beds at 31%. Licensed beds by type are also shown by hospital service area.

Table XX-A provides information on acute hospital beds, admissions, discharges, deaths and inpatient days by service area and county. Psychiatric, chemical dependency and rehabilitation beds located in acute care facilities are included in Table XX-B along with those facilities that are licensed as psychiatric, chemical dependency or rehabilitation facilities. There are 11,615 licensed acute care hospital beds in Mississippi, 638 psychiatric beds, 447 chemical dependency beds, and 265 rehabilitation beds.

A comparison of utilization statistics for 1991 and 1996 is shown in Table XXI. While acute care data decreased from 1991 to 1996, psychiatric, chemical dependency and rehabilitation data increased. Licensed rehabilitation beds remain the same.

Table XXII deals with newborn statistics. Once again, Service Area 3 leads in every category, as does Hinds County. Table XXIII compares the newborn statistics of 1996 with those of 1991 and 1986. There was a -22.2% percent of change in bassinets and a -16.7 percent of change in obstetrical beds set up and staffed. Deliveries decreased slightly from 1986-1996. The percent of change in fetal deaths was -36.8%.

Table XXIV displays discharges, discharge days, admissions and inpatient days by service area for DP SNF, geriatric psychiatric DP, patients 65 and older, Medicare and Medicaid.

Table XXV-A shows beds set up, discharges, discharge days and inpatient days for the State's 102 acute care hospitals. Psychiatric, chemical dependency and rehabilitation data reported by these hospitals is included. Data reported by specialty hospitals is reported in Table XXV-B. Data is broken down into acute care, intensive care, other care, and long-term care. No data was reported for psychiatric intensive care, hospice, psychiatric long term care or mental retardation.

**Obstetrical Utilization**

1996 obstetrical utilization is shown in Appendix A.

**1996 Hospital Patient Origin Data**
Percent of hospital discharges by adjacent county of residence by rank order for combined four quarter patient origin study is shown in Appendix B. Discharges from other counties are grouped together under all others. Patient Origin Study dates used in combined data include October 9 - 22, 1995, January 8 - 21, 1996, April 8 - 21, 1996 and July 8 - 21, 1996. These dates correspond with the majority of hospitals' fiscal year of October 1, 1995 through September 30, 1996.

Hospital Listing

Hospitals are listed alphabetically by county in Appendix C. The hospital directory is located in Appendix D. The licensed bed capacity is reported as of January 1, 1996 whereas the rest of the report is as of the end of the reporting period, usually September 30, 1996.
Map I
Distribution of Mississippi Hospitals by Type of Facility and County

- Medical/Surgical: 100
- Psychiatric/Mental: 7
- Alcoholism & Chem. Dep.: 1
- Rehabilitation: 1
- OB/GYN: 1
- Long Term Acute: 2

Note: Type of facility indicated represents the one category selected by the facility as being the best description of the type of service provided to the majority of admissions.

Includes East Mississippi State Hospital, Mississippi State Hospital, Oak Circle Center and Whitfield Medical Surgical Hospital.

*Patient Origin Study dates used in combined data include October 9 - 22, 1995, January 8 - 21, 1996, April 8 - 21, 1996, and July 8 - 21, 1996. These dates correspond with the majority of hospitals' fiscal year of October 1, 1995 through September 30, 1996. The combined four quarters represent 56 days of inpatient discharges.
