"To Promote And Protect The Health Of All Mississippians"

Mississippi Department of Health Organizational Chart

Message From The State Health Officer

On behalf of the Mississippi Department of Health, its 13 board members and its 2,245 employees, I am proud to present our 2004 Annual Report. We believe this overview of our agency's operations, success stories and reportable performance data continues to demonstrate overall quality improvement and accountability within our agency and for all Mississippians.

Our mission is to promote and protect the health of all Mississippians. We take this responsibility seriously. We will continue to learn from each experience and continue to improve because our focus is on achieving quality service, error-free performance and courtesy to a fault.

The agency looks forward to working with you and serving you in the year ahead.

Brian W. Amy, MD, MPH, MHA

State Health Officer

Mississippi Public Health Success Stories

More than 200 Physicians Attend First-Ever Basic Disaster Life Support Training

More than 200 Mississippi physicians attended a first-ever training on basic disaster life support on June 3, 2004, thanks to the Mississippi Department of Health (MDH) and

the Mississippi State Medical Association (MSMA).

"This training taught physicians important skills about disaster management that their medical training did not include," said Mississippi State Health Officer Dr. Brian Amy.

The free course, held at the Biloxi Grand Casino's Bayview Resort, is just one aspect of ongoing emergency preparedness

and response training and implementation by MDH. The class included training in biological events, natural disaster and traumatic and explosive events, and was taught by physicians from the Medical College of Georgia.

"Even though our state may never see an event like 9/11, we have to be prepared," said Jim Craig, director of the Office of Health Protection at the Mississippi Department of Health. "This course will help Mississippi physicians prepare for the unexpected. Physicians and healthcare professionals must be ready – they may be the first to see the patient," Craig added.

Mississippi Public Health Success Stories, cont'd

Food Safety Town Meetings

During National Food Safety Education month, MDH kicked off a series of town hall meetings focused on food and water safety. State Health Officer Dr. Brian Amy and Director of Health Protection Jim Craig, spoke at the first town meetings in Tupelo and Senatobia. Three additional meetings were held in Walls, Meridian and Greenville in September. Area legislators, restaurant owners, municipal officials and agency employees participated in the meetings.

Emergency Medical Services Day

Hundreds of parents and children attended the first EMS Day celebration. MDH's EMS and Communications teams worked together for what will become an annual event.

The EMS education and public awareness campaign has gone "on the road." Events are scheduled statewide, highlighting prevention and safety messages and providing education on those topics.

Fire Academy For Kids

Mississippi leads the nation in fire-related deaths; hundreds of children receive training

The innovative "Fire Academy for Kids" program is:

- designed to acquaint children with the fire service and provide them with basic fire safety education;
- encouraging partnerships with fire departments to implement the program;
- the reason for seven academies that were conducted this summer at the following: Youth Opportunities, Marks, Mississippi; Vicksburg Fire Department; Jackson Fire Department; Yazoo Fire Department; Canton Fire Department; Ridgeland Fire Department;

Batesville Fire Department; and Laurel Fire Department, serving more than 500 kids;

• saving lives through education, therefore promoting and protecting the health of all Mississippians.

Mississippi Public Health Success Stories, cont'd

Oral Health

Something to smile about.

In just five months, the Mississippi Department of Health Office of Oral Health:

- networked with 30 community water associations to encourage new water fluoridation programs in partnership with the Bower Foundation;
- successfully encouraged 14 public water systems to approve new community water fluoridation programs to serve more than 113,000 Mississippians;
- had major successes with several school-based oral health prevention initiatives:
 - Funded weekly school fluoride mouth rinse program that served 20,773 children at 49 public schools with an annual cost per child of only \$1.14, which is less than half the cost of one tube of fluoridated toothpaste!
 - MDH has already registered about 32,000 children to participate in the weekly mouth rinse program.
 - MDH has started a new daily chewable fluoride program with a local Head Start program
 as a pilot initiative that it plans to expand to eligible public elementary schools
 throughout the state.
- has had oral health success in our Children's Health and Oral Health Assessment and Surveillance Projects:
 - an ongoing program for Sharkey/Issaquena Counties and counties in Public Health District III; this partnership with UMMC School of Nursing's mobile medical/dental clinic, also known as the Mercy Delta Express, focuses on improving the health and healthcare of the citizens of the selected rural Mississippi counties by bringing the health office to the schools. Since January 2004, 573 children in 18 schools received oral health screenings and dental sealants on their permanent first molar teeth. MDH will continue to provide oral health screenings and preventive dental sealants for eligible children through the School of Nursing's mobile health clinic as the new school year commences.

Mississippi Department of Health Technology Advances

Mississippians lead the way by using technology to monitor TB cases.

The Bureau of Tuberculosis and Refugee Health is leading the agency into advanced patient records management with the electronic TB record. As of March 2004, at least one county in each of the state's nine districts is online, and all counties are projected to be online by year's end. Throughout the implementation process, the Bureau has combined technology, quality service improvement and a record of success

to advance the state's use of technology to help promote and protect the health of all Mississippians. This process will not only improve the current maintenance of TB records, but it will also catalyze the development for other agency programs to move toward live, online systems.

In addition, MDH has implemented the use of county planning modules that allow stronger focus on specific health issues identified in each county. By using these new modules, MDH is able to prioritize and take action to resolve those county-specific health issues. Some of the county-specific indicators include child immunization, adult immunization and prenatal care. This technology is a great accomplishment of the Office of Science and will allow each county to receive

MDH & USM Partnership

State Health Officer Dr. Brian Amy and University of Southern Mississippi President Dr. Shelby Thames signed an agreement allowing researchers at the University to access data collected by the Mississippi Department of Health.

The Mississippi Department of Health is following the national direction of the Centers for Disease Control and Prevention (CDC) and the Association of School of Public Health to establish an "academic

health department." This agreement will allow a merging of academic pursuits with service-delivery aspects of MDH.

"This relationship provides an important research arm to the Mississippi Department of Health and will be utilized in developing and evaluating our future programs and activities," said Dr. Amy. "I also believe that our future graduates will now be better armed to enter the health arena."

Communicable Diseases

The concept of public health initially was created to stop the spread of communicable diseases. This work remains vital to a healthy society today.

- In 2003, Mississippi reported 40 primary and secondary syphillis cases the lowest number of syphillis cases when syphilis record keeping began in 1941. The Mississippi case rate is also below the national average for the first time.
- Mississippi continues a 10-year downward trend in incident HIV disease while the rest of the nation experiences significant increases.
- The STD/HIV Bureau's Mobile Clinic has served more than 7,000 Mississippians since being commissioned in August 2002. These services have included screening for syphillis, HIV, gonorrhea and chlamydia, TB, PSA, breast cancer, pap smears, glucose, cholesterol, and blood pressure. The Clinic travels throughout the state and offers 24/7 scheduling options.
- The Bureau (a collaborative effort between the Mississippi Department of Health, University of Mississippi Medical Center Infectious Disease and School of Dentistry, and Mall Services, LLC) will open a 7,515 square foot clinic in the Jackson Medical Mall during the last quarter of 2004. It is the first public health clinic to offer STD, HIV and dental services for people living with HIV disease in the United States. It is federally-funded and will serve patients from 8 a.m. until 9 p.m. each weekday.
- Tuberculosis (TB) morbidity has declined every year for the past 15 years: from 388 cases in 1989 to 128 cases in 2003. The state's case rate (cases/100,000 population) for TB has declined every year for the past 10 years. In 2002 and again in 2003, the case rate for TB in Mississippi was less than the nation's case rate for the first time ever.

Mississippi Public Health Success Stories, Cont'd

We're Making A Difference

Flu & Pneumonia

In 2003, the Mississippi Department of Health vaccinated a record-breaking 152,000 Mississippians for the flu, and nearly 30,000 for pneumonia. MDH took to the road and the fairgrounds, holding special flu and pneumonia vaccine clinics for children, adolescents and adults.

MDH also gave the flu vaccine to Mississippians at all 109 county health departments. In 2003, MDH promoted influenza vaccine through its "Do It For Yourself; Do It For Your Family" campaign in which radio, television and community vehicles advertised the emphasis on and importance of the flu vaccine to Mississippians' health and well-being.

During the regional and county flu and pneumonia clinics, MDH vaccinated nearly 750 senior citizens in one day against flu and pneumonia.

Chief of Staff and Operations

Deputy Director Danny Miller Serves as Chief Operating Officer for MDH. In addition, he administers the Offices of Communications, Health Policy and Planning, Human Resources, Information and Technology, Legal Counsel, Performance Accountability and the Public Health Pharmacy.

Miller is dedicated to providing quality public health service to all MDH customers. He also brings a wealth of knowledge to the area of health policy and planning. Miller ensures that performance-based accountability is a priority in all program areas throughout the agency.

Danny Miller, CPA Deputy Director, Chief of Staff

Communications plans and coordinates agency-wide communication activities on county, district and statewide levels. The Office houses a variety of professional and versatile talent that handles mass media relations, graphic art production, public health campaign development and implementation, social marketing, website development and public records requests. The Office of Communications is also responsible for emergency and risk communication endeavors.

Liz Sharlot, Director Communications

Sam Dawkins, Director Health Policy and Planning

of health care professionals.

Health Policy and Planning provides planning for health services, facilities and manpower on a statewide basis through the development and publication of the State Health Plan, administers the Certificate of Need (CON) program and maintains Rural Health to address rural health care needs.

- The **State Health Plan** provides an overview of the broad spectrum of services provided by MDH to the state of Mississippi, discusses the priority health needs of the state and its population, and documents plans and progress toward meeting those needs. Each plan covers the fiscal year in which it is published. The State Health Plan is available for viewing or printing on the MDH website.
- The **Certificate of Need Program**, a regulatory mechanism, is designed to balance the growth of health facilities and services with the need for those services. Accordingly, staff provides technical assistance to health care facilities and conducts CON reviews of proposed capital expenditures for defined health care facilities and providers.
- Rural Health is responsible for maintaining an information clearinghouse on rural health care issues and innovative approaches to the delivery of rural health care services; coordinating state rural health care activities; providing information on federal, state, and foundation programs to improve rural health care and assisting public and private non-profit entities to participate in programs; collecting data and conducting policy analysis of rural health issues; and assisting hospitals and communities in the recruitment and retention

Human Resources operates under the guidance of the Mississippi State Personnel Board and is responsible for the recruitment, employment, classification, compensation, benefits, affirmative action, employee relations and professional enrichment of the 2,245 employees within the state's public health workforce.

Pat Klar, Director

Mike Scales, Director Information Technology

Information and Technology is responsible for technology development, management and solutions for the agency, as well as data technology procurement, software support, maintenance of computer hardware, operation of the statewide computer network and telecommunications. Information and Technology facilitates strategic plans outlining what technology improvements must be considered to help MDH better achieve its overall mission.

• Technology Infrastructure Support is responsible for operation of the agency's computer hardware including the primary administrative system and all personal computers. The unit is also responsible for data

processing-related procurement, software support and maintenance of computer hardware and operation of the statewide computer network. This unit provides telecommunications facilities for the agency.

- Patient Information Management System (PIMS) is the statewide operational system that tracks patient services and billing of clinic and lab services to Medicaid, Medicare and the Children's Health Insurance Program.
- Public Health Statistics provides a system of vital and health statistics for use at the local,
 district, state and federal levels; provides direct vital records services to the general public;
 provides statistical survey methods, evaluation, and statistical computer systems expertise to
 district, administrative and programmatic staff; and provides information on births and infant
 deaths, a listing of births for immunization follow-up and all Sudden Infant Death Syndrome
 deaths for follow-up by district and county nurses.

Legal Counsel is assigned by the Attorney General's office and is responsible for handling legal matters that pertain to the Mississippi Department of Health.

Performance Accountability conducts internal audits/reviews of the Central Office, county health departments, WIC distribution centers and regional home health offices. These audits/reviews measure

compliance with current program and agency

Jason Easley, CPA, Director Performance Accountability

policies.

Sanford R. Horton, J.D. Head Legal Counsel

The **Public Health Pharmac y** provides medication at the county level for patients who are enrolled in one or more of approximately fifteen public health programs. Most patients served are classified as medically indigent. The Pharmacy has at least 400 different medications and supply items in stock. In addition, the intravenous admixture program is administered through the Public Health Pharmacy and allows cystic fibrosis patients to be released from hospitals at earlier dates and to be managed through home health care, thereby reducing health care expenses.

Charles Nix, Director State Pharmacy

State Epidemiologist

The Office of Epidemiology is responsible for surveillance and detection of reportable diseases and other conditions, in some cases assisting with laboratory confirmation, and coordination of contact investigation and follow-up for cases which require provision of prophylactic medication, vaccine and/or counseling.

The Office monitors occurrences and trends of reportable conditions, initiates investigations of outbreaks of disease, helps coordinate the interruption of outbreaks or disease problems and reports morbidity incidence and trends to the medical community and the public.

Mills McNeill, MD, PhD State Epidemiologist

Through assistance provided by the CDC, the Office is developing additional capacity and expertise in organizing appropriate response messages and response plans for foodborne illness, antibiotic resistance organisms and infections, influenza outbreaks and arborviral disease. Additional support assists the Public Health Laboratory in these areas. Active surveillance for influenza such as illness, upper respiratory infections and unexplained rashes is collected and frequently reviewed as part of early detection of a possible bioterrorism event.

- The Central Cancer Registry collects and maintains data on all invasive cancer cases diagnosed among state residents. Data is used to determine incidence rates of all major cancer types and to identify incidence variations for high-risk population groups or geographic areas within the state. Registry data is also used to determine whether progress is being made toward meeting state and national goals for cancer control. As of July 31, 2004, the Registry is accessible through the University Medical Center in Jackson.
- The Surveillance Branch conducts injury surveillance, hazardous substances emergency events surveillance and environmental surveillance. The Branch responds to more than 600 environmental telephone calls annually, providing consultations and on-site investigations.
- The Injury Surveillance Program and registry is a comprehensive, sensitive system that identifies and tracks spinal cord injuries and traumatic brain injuries. The program reviews more than 400 potential spinal cord injury cases and more than 3,800 traumatic brain injury cases annually.

Peter J. Fos, PhD, MPH Chief Science Officer

Chief Science Officer

The Office of Science was originated two years ago and incorporates and fosters science and research into the public health practice and polices of the agency. This type of knowledge is crucial in the design and implementation of MDH programs; it also allows the agency to understand and identify target areas and populations for improvement interventions.

This year, the Office of Science developed and implemented a valuable new tool to help MDH prioritize funding decisions and allocate limited resources. The County Planning Modules allow MDH staff to utilize statistical data from federal and state sources

to scientifically measure and evaluate the health status of each county and to rank any county in comparison to other counties in the state. (See sample below.)

For example, geography, amount of industrialization, environmental factors and number of physicians available all affect each county's health and are reflected in indicators of health such as infant mortality, rates of disease, number of health facilities and mortality rates.

The program also allows MDH to experimentally measure the health impact of changing certain county indicators. For instance, utilizing this program, it is possible to increase a county's immunization rate and determine what effect it would then have on that county's health ranking compared to the other 81 counties.

		Benchmark	Pop:Physician Ratio	1132	4052.5:1

Sample screen shot of MDH's newly implemented County Planning Module.

State Dental Director

The state's Office of Dental and Oral Health targets efforts toward improving the oral health of Mississippi children and their families.

"Through the work of the Governor's Oral Health Task Force, priority goals have been established for oral health," said State Dental Director Dr. Nick Mosca. "Those goals include creating an effective oral health services infrastructure to assure oral disease prevention and control ensuring available, accessible, affordable and timely access to dental care; and implementing and assuring effective population-based oral health programs that assure good oral health for children."

Nicholas G. Mosca, DDS State Dental Director

Dental and Oral Health has achieved the following this year:

Goal: To increase by 2 percent the proportion of Mississippi's population served by public water systems with optimally fluoridated water.

Outcome: Achieved

Goal: To increase by 25 percent the proportion of children living in Public Health District III who receive dental sealants on their molar teeth.

Outcome: In process

Goal: To maintain and update a dental provider list from which local health departments can make referrals for special needs patients.

Outcome: Achieved

Other progress includes involvement in and/or development of the following:

- Weekly School Fluoride Mouth Rinse Program
- Dental Corrections Program purchase of dental services for indigent children
- Daily Chewable Fluoride Tablet Program
- MCH Title V Block Grant Needs Assessment
- Governor's Oral Health Task Force
- Cross Roads Dental Clinic
- FY 2004 Dental Health Professional Shortage Area Survey
- Head Start Oral Health Forum
- FY 2004 Association of State and Territorial Director's State Synopsis Survey
- FY 2004 Pregnancy Risk Assessment Monitoring Survey (PRAM)
- Mississippi Partnership for Comprehensive Cancer Control

District Health Officers

The Mississippi Department of Health's District Health Officers are public health ambassadors to communities statewide. District Health Officers maintain medical expertise as well as ongoing community relations, and they are depended on to communicate public health efforts to a wide variety of Mississippians, gauge needs throughout the state and let residents in their districts know what MDH is doing to promote and protect the health of all Mississippians.

Alfio Rausa, MD Health Officer Districts I & III

Robert Trotter, MD Health Officer Districts II & IV

Mary Gayle Armstrong, MD Acting Health Officer District V

Rebecca James, MD Acting Health Officer District VI

Clay Hammack, MD Health Officer Districts VII & VIII

Robert Travnicek, MD Health Officer District IX

Lovetta Brown, MD Medical Director Health Disparity

Medical Director for Health Disparity

Health Disparity assists in carrying out MDH's mission to promote and protect the health status of all Mississippians through education and elimination of health disparities. The goal is to eradicate health disparities within our agency and advocate removing health disparities throughout Mississippi. Despite notable progress in the overall health of the nation, research shows continuing disparities in the burden of illness, medical access and treatment, and death experienced by various cultural and social groups throughout the country. The demographic changes anticipated over the next decade magnify the importance of addressing disparities in health status, especially in Mississippi. MDH will develop tools to monitor the state's process toward improving the health status of the people.

Mary Gayle Armstrong, MD Medical Director Health Promotion

Medical Director for Health Promotion

Health Promotion works to prevent disease and injury and promote optimal health through health education, program implementation, policy development, evaluation and partnerships. Through MDH's variety of programs, Health Promotion provides support services designed to improve the health of all Mississippians. Most of these services are formatted for schools, community health site initiatives and work site programs.

Mitchell Adcock, CPA Director

Finance and Administration

• Finance and Accounts is tasked with handling the agency's budget and administering the agency's financial spending in the public health arena. The FY 2004 spending figures are reflected by major categories and by funding sources and are highlighted in graphs below. The graphs and charts in this section show the current year expenditures with comparisons of current to prior year major category and program expenditures.

The Mississippi Department of Health expended \$238,528,741 for FY 2004 operations.

State General Fund

Special Fund Expenditures

- Evaluation/Quality is responsible for performance measurement activities and quality initiatives. The Office consists of Service Quality and Public Health Nursing:
 - Service Quality conducts an annual review of each district to ensure systems are in place to monitor the quality of services provided in each county health department; reviews the corrective action/responses to Performance Accountability; reports and follows up to determine training needs, trends, opportunities for improvement and policy changes; and ensures the agency is in compliance with current HIPAA (Health Insurance Portability and Accountability Act) requirements.
 - Public Health Nursing monitors the standards of practice across program lines. Through these monitoring and consultative activities, Public Health Nursing provides assistance in determining staffing needs, classification needs, continuing education needs and personnel management for the nursing component of the public health care delivery system.
- Facilities and Property Management is responsible for ensuring indoor and outdoor upkeep, security and maintenance of MDH's central campus facility. Specifically, this area maintains upkeep of the print shop, central supply and maintenance divisions of MDH.
- District/County Health Department Administration consists of two basic areas: each county's health department and the Bureau of Home Health.
 - County Health Departments MDH operates health departments accessible to every county. County health department staff generally includes public health nurses, nurse practitioners, physicians, disease investigators, environmentalists, medical records clerks, social workers and nutritionists. County health departments provide a wide range of public health services to Mississippians: immunizations, family planning, WIC Supplemental Food Program, tuberculosis treatment and prevention services, and sexually transmitted disease services. Other services such as child and maternal services are available based on the county's needs. MDH maintains programs to reduce the risk of particular health problems and to control or prevent such non-communicable diseases as diabetes, cancer, hypertension, and cardiovascular disease.

The Mississippi Department of Health has nine public health districts with approximately 109 clinics spread throughout the state, providing Mississippians in each county with accessibility to at least one nearby clinic.

District/County Health Department Administration, cont'd

• Home Health provides home health services throughout the state and has done so since 1965. Home Health has 13 offices statewide and accepts referrals for services in compliance with Medicare and Medicaid, and as one of the low cost providers in the state.

Services provided by Home Health's delivery system include: skilled nursing; home health; physical, occupational and/or speech therapy; patient equipment and medical supplies; medical social services; laboratory and pharmacy services; and diet and nutritional counseling.

Jim Craig, Director Health Protection

During FY 2004, the 21st year of the EMS Operating Fund's existence, MDH's Division of EMS spent \$1.87 million to enhance Emergency Medical Services in Mississippi.

Collections came from a \$5 assessment on each moving vehicle violation fine.

Health Protection

Health protection for the people of Mississippi is one of the chief responsibilities of the Mississippi Department of Health. From the quality of our food and water, to child care and professional licensing, our concerns embrace every aspect of life across the state. Our goal is to achieve and maintain the highest standard of health for all Mississippians.

 Public Health Preparedness/Emergency Medical Services (EMS)

Public Health Preparedness is responsible for preparedness, plans, and responses for public health and agency needs

created by a natural or man-made event. Federal resources such as CDC-Strategic National Stockpile, and HRSA-Hospital Preparedness activities are managed by this office. All activities related to emergencies are coordinated through the Mississippi Emergency Management Agency (MEMA) and MDH as part of the state emergency response plan. The Emergency Medical Services Bureau (EMS) organizes, regulates,

and maintains a statewide program to improve emergency

medical care; tests and certifies Emergency Medical Technicians (EMTs) on the basic, intermediate, and paramedic levels; and administers federal and state funding for local level EMS. EMTs responded to more than 327,000 calls for help in FY 2004.

- Environmental Health oversees programs to control hazards to health from radioactive materials, x-ray devices, unsafe boilers and pressure vessels, and rats, mosquitoes and other disease vectors; administers the state-authorized consultative occupational health and safety program; and enforces standards for protection of consumers against preventable hazards in food, milk and water.
 - The Hazardous Substances Emergency Events Surveillance (HSES) Program recorded and analyzed data associated with the release of hazardous substances (excluding petroleum products) to ascertain public health risks until the grant cycle ended in September 2004. The program collected approximately 1,000 potential HSEES events annually. Through July 29, 2004, preliminary data showed 190 events qualified for HSEES with an approximately 400 additional non-HSEES events reported. From 1995 to 2002, HSEES logged 1,333 events with 544 victims and 1,001 associated injuries (individuals could have multiple injuries). Fixed facilities accounted for 736 (55.2%) events while 597 (44.8%) were transportation-related.
 - The Radiological Health Division maintains and enforces regulatory standards designed to ensure that the exposure of Mississippians to harmful radiation is kept at a low level.

Public health's approximately 111 county and field environmentalists issued final approvals for:

- 2,847 individual onsite wastewater disposal systems
- 1,268 existing wastewater disposal systems
- 53 sewage pumpers'licenses
- 1,018 private wells
- 3,961 general sanitation complaints

Health Protection, cont' d

Environmental Health, cont'd

• Water Supply regulates the engineering design, construction, operation and maintenance of public water systems; coordinates the water quality monitoring program; enforces the water quality standards of the Federal and Mississippi Safe Drinking Water Acts; ensures that each community/non-transient non-community public water system is operated by a certified waterworks operator; and administers the Drinking Water State Revolving Loan Fund. More than 98% of Mississippi Community and Non-Community, Non-Transient Public Water Systems employed certified operators during the year. The Mississippi Drinking Water State Revolving Loan Fund has awarded \$97,211,086 for construction of improvements on 125 projects since 1997. In FY 2004, 18 projects were initiated for \$17,468,018.

The Mississippi Department of Health's Water Supply division helps ensure that the 2.8 million Mississippians – approximately 97% of the state's population who rely on the state's 1,400 public water systems – are routinely provided safe drinking water.

• *Licensure* provides oversight and enforcement of regulations and technical support for the provision of emergency medical services; provides minimum standards of health and safety in child care facilities; and provides licensure of special health professionals and health care facilities.

In FY 2004, Licensure:

- Licensed or registered in excess of 9,300 individuals in allied health professions
- Licensed 1,774 child care facilities and completed 3,357 inspections
- Inspected and licensed 42 youth camps
- Investigated approximately 542 complaints related to child care facilities and providers
- Inspected 710 health care facilities
- Investigated 649 complaints and incidents in healthcare facilities

Staff:

- Inspected 2,145 x-ray devices used in the healing arts profession and 131 radioactive material licenses
- Inspected and analyzed 1,229 environmental samples from the vicinity of Grand Gulf Nuclear Station and the Salmon Test Site in Lamar County
- Tested 18 water supplies for radioactivity in accordance with EPA \Safe Drinking Water Act
- Evaluated 1,152 occupied areas in public schools and government buildings for radon.

Health Protection, cont' d

- Communicable Disease staff work with the Immunization, STD/HIV and Tuberculosis Programs:
 - Immunization Program staff strive to ultimately eliminate morbidity and mortality from vaccine-preventable diseases by working with federal and state agencies, local health departments, physicians and other private immunization providers, schools, hospitals, nursing homes, licensed child care facilities, community-based organizations and the public. Targeted diseases include diphtheria, tetanus, pertussis, polio, measles, mumps, rubella, varicella, Haemophilus influenza type B, hepatitis B, influenza and pneumonia.
 - Sexually Transmitted Disease (STD)/Human Immunodeficiency Virus (HIV) area consists of three branches: Surveillance, Quality Assurance, Prevention and Education and CARE and Services. The staff also operates the Mobile Medical Clinic, a 38-foot long vehicle with two examination and treatment rooms, complete climate control, and a power generation system that allows it to appear at numerous events and sustain operations independent of any external support.

During FY 2004, approximately 20,000 cases of reportable diseases were recorded. Reported cases included such diseases and conditions as required, including encephalitis, E.Coli 0157:H7, hepatitis, Lyme disease, malaria, meningitis, salmonellosis, rabies, tetanus, tularemia, rocky mountain spotted fever, legionellosis, tuberculosis, and sexually transmitted diseases.

In FY 2004, Mississippi reported:

- 15 cases of hepatitis A
- 17 cases of pertussis (whooping cough)
- no cases of mumps
- no cases of measles, diphtheria, or polio.

In CY 2003,

• 87.8 percent of Mississippi's two-year-olds were fully immunized by 27 months old.

- The *Surveillance and Quality Assurance* branches provide ongoing, systematic collection, analysis, evaluation, and dissemination of data describing STDs and HIV disease.
- The *Prevention and Education* branch plans, implements and evaluates prevention interventions designed to reach high priority target populations. It also coordinates the distribution and management of federal funding provided to nine community-based organizations (CBOs) throughout the state.
- The *CARE and Services* branch manages funds Mississippi receives under the provision of Title II of the Ryan White Comprehensive AIDS Resources Emergency (CARE) Act. These federal dollars are often the only funds available to people living with HIV disease for life-sustaining therapies. The Housing Opportunities for People with AIDS (HOPWA) Program, also managed by this branch, enables people living with HIV disease and their families to remain together by providing assistance for emergency and long-term housing, and with essential activities of daily living.

STD/HIV

- Mississippi now ranks 26th in the nation in syphillis, down from first in the nation nine years ago.
- The number of new HIV cases in Mississippi continues to decline from 707 in 1995 to 549 in 2003.
- During CY 2003, 40 cases of Primary and Secondary (P & S) Syphillis were reported a 65 percent decrease from CY 2001.
- During CY 2003, an estimated 15,000 people benefit led from these services.
- The AIDS Drug Program served over 1,050 people in CY 2003.
- The Home-Based Program provided aerosolized pentamidine and injection therapies to 78 people.
- The *Tuberculosis Program* provides early and rapid detection of persons with tuberculosis or at risk of developing tuberculosis, appropriate treatment and follow-up of diagnosed cases of tuberculosis, and preventive therapy to persons at risk of developing tuberculosis.

Health Protection, cont' d

The *Public Health Laboratory,* built in 1956, serves as a reference lab for the entire state, providing low-cost, high-quality testing services. Laboratory personnel provide clinical and environmental analysis for public health clinics, private physicians, hospitals, laboratories, public water systems, and individuals. Mississippi's Public Health Laboratory is accredited by the Food and Drug Administration for milk testing, the Environmental Protection Agency for drinking water testing, and the U.S. Centers for Medicare and Medicaid Services for clinical testing. The lab is registered and accredited under the Clinical Laboratory Improvement Act and is a member of the Centers for Disease Control and Prevention and the Association of Public Health Laboratories Laboratory Response Network for Bioterrorism.

Lab staff process more than 750,000 specimens a year.

Danny Bender, Director Health Services

In FY 2004, the First Steps Early Intervention Program served 6,134 children and families and approximately 2,400 children were referred to the program.

During December 2003, First Steps conducted a statewide family satisfaction survey. Initial analysis of the survey revealed that 86% of the survey responses were positive.

The survey has provided extensive insight into families' perception of the First Steps Program and will be used to improve the delivery of services statewide.

Health Services

Health Services addresses women's and children's health care needs in Mississippi. Health programs provide Mississippi women and children in the state with optimal health opportunities by offering services and assistance in the areas of breast and cervical cancer, early intervention, and related programs.

- Child/Adolescent Health provides preventive and sick child services statewide to children at or below 185 percent of poverty. Children in need of further care are linked with other MDH programs and/or private care providers necessary for effective treatment and management.
 - The Children's Medical Program (CMP) provides services directed toward assuring availability of comprehensive care for children and adolescents with special health care needs. Programs are rehabilitative in nature and link families and patients to related resources. CMP generally serves individuals from birth to 21 years.

entitlement for children with their families.

disabilities and

- Women's Health provides and ensures access to comprehensive health services that affect
 positive outcomes for women, including early cancer detection, domestic violence
 prevention and intervention, family planning and maternity services.
 - The Breast and Cervical Cancer Early Detection Program works to reduce high morbidity and mortality caused by breast and cervical cancer in Mississippi's uninsured, underinsured and minority women. Women 50 years of age and older are the target group for mammography screening, and women 45 years and older are the target for cervical cancer screening. From July 1998 to August 3, 2004, more than 13,700 women were screened through the agency's Breast and Cervical Cancer Program.
 - Family Planning Services promotes awareness of and ensures access to reproductive health benefits by encouraging individuals to make informed choices that provide opportunities for healthier lives. More than 88,000 Mississippians some 25,000 of them 19 years of age or younger took advantage of comprehensive family planning services during FY 2004. High on the target priority list of recipients are sexually active teens and women 20 to 44 years of age with incomes below 150 percent of poverty level. In FY 2004, the family planning patient case load decreased by 10,323. However, program providers met all indicators required for compliance with federal regulations. Based on the numbers and characteristics of Family Planning Program participants in FY 2004, some 14,447 unwanted, unplanned pregnancies were prevented; of those, some 4,127 would have been pregnancies to teens.
 - Osteoporosis Screening and Awareness establishes, maintains and promotes an osteoporosis prevention, treatment and education program.

Health Services, cont'd

Women's Health, cont'd

• The Domestic Violence/Rape Prevention and Crisis Intervention Program provides specific resources through contracts with domestic violence shelters and rape crisis programs. The domestic violence shelters provide direct services to women and children who are victims of domestic violence.

In FY 2004, the 13 domestic violence shelters that received funding from the program:

- answered 26,864 crisis line calls
- provided shelter for 2,212 women and children

Domestic violence shelters provided:

• educational activities to 70,598 participants through a total of 1,570 programs

Rape Crisis Programs:

- answered 18,787 service and referral calls
- conducted 432 community education sessions with a total of 11,984 participants
- youth education training was provided to 35,751 males and females
- law enforcement training included 32 sessions to a total of 550 participants
- The Genetics Program provides comprehensive genetic services statewide, including newborn screening, diagnosis, counseling, and follow-up of a broad range of genetic-related disorders. The program screens Mississippi newborns for a total of 40 genetic disorders. Mississippi has one of the most comprehensive newborn screening programs in the nation. The Genetics Program screens an average of 3,550 newborns per month for genetic disorders.
 - Approximately 230 infants per month require follow-up for inconclusive or abnormal newborn screening results.
 - An average of 165 children and families received genetic clinical services each month through county health departments and satellite clinics in FY 2004.
- Maternity Services aim to reduce low birth weight and infant mortality and morbidity in Mississippi by providing comprehensive, risk-appropriate prenatal care through county health departments.
- The Perinatal High Risk Management/Infant Services System (PHRM/ISS) provides a multidisciplinary team approach to high-risk mothers and infants statewide. These enhanced services include nursing, nutrition and social work. This team of professionals provides risk screening assessments, counseling, health education, home visiting and monthly case management.
- Pregnancy Risk Assessment Monitoring System (PRAMS) is part
 of the Centers for Disease Control and Prevention (CDC) initiative
 to reduce infant mortality and low birth weight. PRAMS is an
 ongoing, state specific, population-based surveillance system
 designed to identify and monitor selected maternal behaviors
 and experiences before, during and after pregnancy.

Health Services, cont'd

 WIC — Special Supplemental Nutrition Program for Women, Infants, and Children

WIC improves the outcome of pregnancies; reduces health problems associated with poor nutrition during pregnancy, infancy and early childhood; and reduces infant mortality. WIC provides special supplemental food and nutrition education to low-income pregnant, postpartum, and breastfeeding women, infants, and preschool children who have nutrition-related risk conditions.

The Mississippi Breastfeeding Promotion and Support Program
has been recognized as a national model by the USDA Food and
Nutrition Services. The Loving Support Breastfeeding Campaign
is recognized as a national model for 19 states and the Mississippi
Choctaws.

A formal evaluation of the Mississippi Loving Support campaign showed it had a profound impact on Mississippi's breastfeeding rates. Current data reflects an overall statewide initiation rate of 52.4% and a WIC-specific rate of 42.9%.

Mississippi's effort will be the model for states as widespread as Alaska, Vermont and Kentucky, as well as sixteen others, plus the Choctaw nation.

USDA will utilize the "Loving Support" program to implement best practices in peer counseling. The model being used in this program reflects the Mississippi model.

Mississippi will receive over \$100,000 in additional funding to enhance the breastfeeding program statewide and to develop standardized training.

- **Preventive Health** staff works to prevent disease and injury and promote optimal health through health education, program implementation, policy development, evaluation and partnerships. It provides support services aimed at schools, community health and work site programs to improve the health of all Mississippians.
 - The *Health Education Program* provides and supports services aimed at schools, communities, worksites and health care settings.
 - Through its *Tobacco Prevention Program*, the Mississippi Department of Health is continuing to take actions in making tobacco prevention a mechanism for positive social change.
 - Since September 1998, the *Cardiovascular Health (CVH) Program* has received funding from CDC to conduct activities to identify and address the burden of cardiovascular disease in Mississippi.
 - The *Injury and Violence Prevention Program* provides public education, technical assistance and safety assessment and awareness of preventable death and disability due to injury and violence.
 - The *Community and School Health Program* advocates community awareness, public health education and coordinated school health education initiatives that promote healthy lifestyles.

Health Services, cont'd

Preventive Health, cont'd

- The Chronic Disease Program serves in the capacity of program planning, objective setting, establishing protocol, quality assurance, and lending support services to public health districts and county health departments.
- The *Diabetes Program* provides support services for persons with diabetes, including screening and referral for definitive diagnosis, joint medical management, education, informational materials and diet counseling.
- The *Diabetes Prevention and Control Program* (DPCP) is funded by the Centers for Disease Control and Prevention (CDC) and addresses seven national objectives: increase annual foot examinations, increase annual eye examinations, increase flu/pneumococcal vaccinations, increase HgA1C testing, reduce health disparities, establish successful wellness programs and establish measurement procedures to track the program's success.
- The *Hypertension Program* provides screening, detection, diagnosis, treatment or referral for treatment and follow-up on compliance in cooperation with the patient's physician as a joint management effort.

Changes in State Law

2004 Legislative Session affecting the Mississippi Department of Health:

Health Planning/Certificate of Need

Certificate of Need for Mississippi State University and Health Care Provider for Linear Accelerator and Magnetic Resonance Imaging Unit

House Bill 1345 directs the issuance of a certificate of need to Mississippi State University and a health care provider to acquire and jointly operate a linear accelerator and magnetic resonance imaging (MRI) unit in the City of Starkville.

Critical Access Hospitals

Senate Bill 2519 revises the definition of critical access hospitals in Mississippi to conform to federal law.

Epidemiology/Infectious Disease

Statewide Hepatitis C Plan and Permit Obesity Council to Become Nonprofit Entity House Bill 1046 directs MDH to prepare a statewide Hepatitis C virus plan before January 1, 2006; permits the Mississippi Council on Obesity Prevention and Management to become a nonprofit entity and extends its operation under MDH until July 1, 2006 or until such time as established as a nonprofit entity.

Health Regulation - Health Care Facility Licensure

Repealer of Licensure Standards for Personal Care Homes Extended
Senate Bill 2434 extends the automatic repealer on certain licensure standards for personal care homes to June 30, 2006.

Health Care Worker Criminal Background Check Requirements

Senate Bill 2607 allows health care professional/vocational technical academic programs to conduct criminal background check on its students; provides a procedure for University of Mississippi Medical Center to conduct its own criminal background checks on its employees; provides that nursing and other health care students performing clinical training are not subject to criminal record background check requirements under specific conditions; provides that health care professional staffing agencies are covered entities for purposes of conducting their own background checks on its employees.

Rural Health Availability Act

Senate Bill 2850 creates the "Rural Health Availability Act" that establishes a procedure for hospitals and other business entities to enter into cooperative agreements to enhance hospital care; directs MDH to issue a certificate of public advantage for a cooperative agreement upon certain conditions and to actively monitor and regulate such agreements.

Health Regulation – Professional Licensure

Professional Art Therapist Regulatory Law

Senate Bill 2009 deletes the repealer of the Professional Art Therapist Regulatory Law.

Health Services

Abortion Complication Reporting Act

House Bill 1525 requires physicians to make written reports to the department of health on medical treatment or death, which is the result of an induced abortion.

Abortion Procedures

House Bill 1038 changes the requirement that abortion procedures must be performed from after 16 weeks to after first trimester only at an ambulatory surgical facility or hospital.

Health Regulation - Emergency Response

Ambulances and Emergency Vehicles

House Bill 1626 revises certain provisions regarding operation of ambulances and other emergency response vehicles.

First Responders and Medical First Responders

House Bill 445 revises the definition of "First Responder" in the Emergency Medical Services law and provides that First Responders will no longer be regulated by MDH; provides for certification and regulation of "Medical First Responders" by the MDH; deletes authority of First Responders to carry and administer epinephrine.

Chronic Disease

Mississippi Clearinghouse for People with Disabilities

House Bill 1407 establishes a Mississippi Clearinghouse for People with Disabilities and provides for its membership that MDH be represented on commission; prescribes the powers and duties of the clearinghouse.

Cervical Cancer Special Task Force

House Concurrent Resolution 95 creates a special task force to study the prevalence of cervical cancer and human papilloma virus in women in Mississippi and to evaluate the current methods of public education and report to legislature on or before March 1, 2005.

Task Force on Heart Disease and Stroke Prevention

Senate Bill 2314 revises the membership of the task force on heart disease and stroke prevention and clarifies the reporting requirement of the task force; directs task force to report on annual basis.

Month of May Designated as Mississippi Osteoporosis Month

Senate Concurrent Resolution 505 Concurrent Resolution that establishes the month of May as Osteoporosis awareness month in Mississippi; encourages MDH to implement Osteoporosis Prevention and Treatment Education Act (Miss. Code §§ 41-93-1 through 41-93-9); directs MDH to establish and coordinate an advisory panel on osteoporosis and file annual report by December 1, 2003 and each year thereafter.

Health Regulation - Child Care Facility Licensure

Child Care Licensing Law

House Bill 402 extends the repeal date on the exemption of certain accredited schools from the child care licensing law until July 1, 2006; requires child care facilities to develop and maintain current contact list for each child provided care by facility; allows for agreement between child care facility and child's parent to contact when child does not arrive in reasonable time.

Other Legislation

Deletion of Reporting Illegitimate Births

Senate Bill 2437 deletes the requirement in Miss. Code § 97-29-11 that MDH report names of persons on birth certificates of illegitimate children to each district attorney on a monthly basis.

Changes in Regulations

The State Board of Health passed these changes in health plans and agency regulations during the 2004 fiscal year:

July 9, 2003

Approved Amendments to Regulations Governing Registration of Individuals Performing Tattooing and Individuals Performing Body Piercing.

Approved Revisions to Minimum Standards for Operation of Institutions for Aged and Infirmed (Nursing Homes).

The revisions include minimal changes to TB, insertion of language allowing the use of Schedule II narcotics in Personal Care Homes, and addition of Criminal History Record Checks.

Approved Revisions to Minimum Standards for Operation of Personal Care Homes – Assisted Living.

The revisions include minimal changes to TB, changes to IDR process and addition of the Criminal History Record Checks.

Approved Revisions to Minimum Standards for Operation of Personal Care Homes – Residential Living.

The revisions include minimal changes to TB, insertion of language allowing the use of Schedule II narcotics in Personal Care Homes, and addition of the Criminal History Record Checks.

Approved Revisions to Minimum Standards for Operation of Hospitals.

Approved Revisions to Minimum Standards for Operation of Home Health Agencies.

Approved Revisions to Minimum Standards for Operation of Hospices.

Approved Proposed Changes to the Regulations Governing Individual Onsite Wastewater.

Approved Changes to the Regulations Governing Individual Onsite Wastewater.

Approved Amendments to Existing Emergency Medical Services (EMS) Rules and Regulations.

Approved Amendments to Existing Trauma Regulations.

October 8, 2003

Approved Minimum Standards of Operation for the Institution for the Aged and Infirmed, Personal Care Homes— Assisted Living, and Personal Care Homes— Residential Living. Changes that would affect all three are changes to the Informal Dispute Resolution Process (ICR). This change would allow the State Health Officer to appoint someone in the event one of the members on the panel needed to be absent.

The other change affects only the Personal Care Homes - Assisted Living and Residential. It deletes reference to surveyors who successfully passed the Surveyor Minimum Qualifications Test and the reference to Surveyor Minimum Qualifications Test.

Approved Amendments to Mississippi Primary Drinking Water Regulation.

January 14, 2004

Approved Proposed Changes to Chapter XII (Comprehensive Medical Rehabilitation CON Criteria and Standards) of the FY 2004 State Health Plan.

Approved Amendments to the Regulations for Control of Radiation in Mississippi.

Approved Amendments to Existing EMS Rules and Regulations.

Approved Regulation Governing Individual Onsite Wastewater Disposal, Design Standard III Gravel Replacement Disposal Systems.

April 14, 2004

Approved Amendments to Existing EMS Regulations.

Section 2 - Regarding transfers of patients, the modification allows that EMTs may attend and transport patients who have pre-existing procedures or devices beyond their scope if there is no need or reasonable perceived need for the device or procedure during transport.

Section 7 – Includes the exact modification as above under basic life support.

Section 8 – Includes the exact modification as above for advanced life support paramedics.

Approved Amendments to Existing Trauma Regulations.

Chapter II - A definition is added to the trauma team

Chapter VI - Provides for administrative funding to level four hospitals and further define the trauma registry inclusion criteria

Chapter XIV - Modifications to reduce the paperwork burden of our level four trauma centers based on comments that were received during a public hearing of level four administrators

Chapter XV - Modifies our inspection process for level four trauma centers as requested again through public comment of level four administrators and physicians.

Approved Proposed Amendments to Onsite Wastewater Regulation.
