

Mississippi State Public Health Meaningful Use Eligibility Criteria

Eligible Hospitals

Eligible Hospitals (EHs) and Critical Access Hospitals (CAHs) may register for the following objectives:

- Electronic Lab Reporting
- Immunization Registry Reporting
- Syndromic Surveillance Reporting

Eligible Clinicians

Professionals working in an individual practice or clinic, or a multi-clinic group, may register for the following objectives:

- Cancer Registry reporting if the practice or clinic diagnoses and/or treats cancer (oncologists, pathologists, dermatologists, and radiologists)
- Immunization Registry reporting (if the practice or clinic administers immunizations).
- Syndromic surveillance, if the single clinic or multi-clinic group:
 1. Utilizes a hospital's EHR and its Syndromic Surveillance data is included in the hospital's Syndromic Surveillance interface
 2. Utilizes a separate EHR and the hospital's HIT infrastructure, such that one interface includes both the hospital's and clinic's Syndromic Surveillance data.) **AND**

Provides at least one of the following types of care:

- Urgent, acute, or walk-in care
- Primary care, defined as:
 - General practice
 - Family medicine
 - Pediatric medicine
 - Internal medicine
 - OB/GYN (non-surgical)
 - Women's Health
 - Geriatric medicine
- Infectious disease specialty care
- Environmental health specialty care

- Occupational health specialty care

Eligible Clinicians practicing at clinics that do not meet the above criteria for syndromic surveillance may qualify for an exclusion for syndromic surveillance reporting.
